ALTO PRODUCTS CORP.,

Alto.

**OPPOSER'S RESPONSE TO APPLICANT'S MOTION TO COMPEL DISCOVERY
AND APPLICANT'S MOTION FOR SUMMARY JUDGMENT OR, IN THE
ALTERNATIVE MOTION TO STAY PROCEEDINGS**

Opposer, Schlage Lock Company, submits this response to Applicant's Motion to Compel Discovery, Applicant's Motion for Summary Judgment, and Applicant's Motion to Stay Proceedings.

Opposer respectfully requests that the Board deny Applicant's motions. Opposer filed the present opposition against Applicant, Alto Products Corp. ("Alto") on the basis that Alto's pending application for the mark KRYPTONITE is likely to cause confusion with respect to Opposer's numerous registrations for the mark KRYPTONITE. Opposer's KRYPTONITE registrations cover various security devices and accessories, in particular, Opposer has manufactured and sold locking mechanisms designed specifically for automobiles (See Rizzo Decl. ¶4, Ex. B.) and locking mechanisms designed for general purposes that could be used in mechanics' shop settings, and owns registrations that cover these goods. (See Rizzo Decl. ¶2, 3, and 5, Ex. A.) Indeed, not only do Alto and Opposer both market goods directed to the

07-11-2005

U.S. Patent & TMO/TM Mail Rcpt Dt. #72

automotive market, Alto's and Opposer's goods have both been marketed simultaneously and sold through the same retail vendors. (See Rizzo Decl. ¶6, Ex. C.)

It is undisputed that Opposer is currently engaged in litigation with D.C. Comics. *See D.C. Comics v. Kryptonite Corporation*, No. 00 CV 5562 RO ("the Litigation"). The Litigation has been pending for nearly five years and at issue is the right to the trademark KRYPTONITE. It is also undisputed that in 1983, Opposer entered into an agreement with D.C. Comics that licensed Opposer's use of the KRYPTONITE mark in connection with "security devices and accessories therefore, without limitation, such as mechanical and electronic locking means and accessories therefore and accessories primarily for two-wheeled vehicles such as handle bar grips." In the Litigation, the parties are contesting the meaning of the term "without limitation." However, Opposer continues to sell goods under the KRYPTONITE mark that fall within the license grant, however it is interpreted. Thus, Opposer will continue to own enforceable rights in the KRYPTONITE trademark, regardless of any decision that may be made in the Litigation with D.C. Comics. Opposer owns numerous incontestable registrations for KRYPTONITE that are pleaded in the Notice of Opposition. Opposer therefore has standing to bring the present opposition and every right to have the opposition decided on the merits.

Whether there is a likelihood of confusion in this matter depends on many contested factual issues, as discussed below. Summary judgment is therefore unwarranted.

ARGUMENT

I. Response to Motion for Summary Judgment

A. The Standard for Summary Judgment

Summary judgment is appropriate where the movant shows that there is no genuine issue of material fact and that it is entitled to judgment as a matter of law. Fed. R. Civ. Pro. 56(c); *Celotex Corp. v. Catrett*, 477 U.S. 317, 322 (1986). All reasonable inferences and doubts drawn from the record must be resolved against the moving party and in favor of the responding party. *See McCarthy on Trademarks and Unfair Competition*, J. Thomas McCarthy, 20:132, *Opryland USA Inc. v. Great American Music Show, Inc.*, 970 F.2d 847, 23 U.S.P.Q.2d 1471 (Fed. Cir. 1992) (“The evidence submitted by the non-movant, in opposition to a motion for summary judgment, ‘is to be believed, and all justifiable inferences are to be drawn in [its] favor.’”).

In deciding a motion for summary judgment, the Board may not resolve an issue of fact, but may determine whether a genuine issue of material fact exists such as to defeat the movant’s motion for summary judgment. *Meyers v. Brooks Shoe Inc.*, 912 F.2d 1459, 16 USPQ2d 1055 (Fed. Cir. 1990).

Alto has failed to support its motion for summary judgment with any evidence. Indeed, all of the evidence currently available demonstrates that there are issues of material fact at issue. Therefore, Alto’s motion for summary judgment should be denied.

B. The 1983 Agreement

As Alto acknowledges in its brief, Opposer owns rights under the 1983 agreement with D.C. Comics to use and register the mark KRYPTONITE in connection with “security devices and accessories therefore, *without limitation*, such as mechanical and electronic locking means and accessories therefore, and accessories primarily for two-wheeled vehicles such as handle bar

grips.” [emphasis added] All types of locking mechanisms fall within this definition. Thus, even if Opposer’s rights are limited to the rights set forth in the 1983 agreement, Opposer has every right and basis to proceed with this opposition, as there are material issues of fact that locking mechanisms in the automotive market are likely to cause confusion with the automotive parts offered by Alto in connection with its mark.

C. Likelihood of Confusion

Alto cites the case *In re E. I. DuPont Demours & Co.*, 476 F2d 1357 (CCPA 1973) in support of its position that there is no likelihood of confusion between its mark and those owned by Opposer. The DuPont Court considered the following factors in evaluating whether a likelihood of confusion exists between two marks: (1) the similarity of the marks; (2) the relatedness of the goods; (3) the similarity of established, likely to continue trade channels; (4) the conditions under which and buyers to whom sales are made; (5) the number and nature of similar marks in use on similar goods. Alto references other “factors” which are not those considered by the court in the *DuPont* case, as discussed at greater length below.

Furthermore, Alto fails to consider the one factor given the greatest weight by the *DuPont* case; *the similarity of the marks*. In this case, despite Alto’s contention to the contrary, the marks at issue are identical. Toward the end of its argument in this section, paragraph number 8, Alto makes the following statement: “Marks [sic] are sufficiently different as not to cause confusion . . . the degree of similarity between the mark of Applicant and Opposer’s marks are so different that no potential consumers will ever be confused.” Alto provides no substantiation for this point, which on its face is false. The marks at issue, KRYPTONITE, are identical. *See In re Opus One, Inc.*, 60 U.S.P.Q.2d 1812, 2001 WL 1182924 (T.T.A.B. 2001) (“[T]he greater the degree of similarity between the applicant’s mark and the cited mark, the

lesser the degree of similarity between the applicant's goods or services and the registrant's goods or services that is required to support a finding of likelihood of confusion.").

Further, Alto offers no evidence in support of its statement that, "the marketing of the parties' goods in connection with the mark KRYPTONITE are different." This misstates the relevant *DuPont* factor, which looks to the relatedness of the goods offered by the parties in connection with each mark. Alto identifies the following goods in its application: "Automotive parts, namely anti-friction materials used on clutch plates sold through wholesalers to automotive professionals that are used in automotive repair." Opposer's existing registrations cover locking mechanisms and securing devices of all kinds, and specifically U.S. Reg. No. 2,643,213 covers "electronic locks and security equipment, namely...electronic vehicle locks;" U.S. Reg. No. 2,656,797 covers "...metal latches...metal dead bolts; metal lock boxes;" and U.S. Reg. No. 2,269,238 covers "metal locks, metal locking mechanisms, metal security cable, metal integrated locks and cable." (See Meddings Decl. ¶2, Ex. A.) Such goods are related to Applicant's goods, as locking mechanisms can be and are used in the automobile and automotive repair fields, and can be and are used by automotive professionals to secure mechanics' tools and other items in the service shop. *See McCarthy on Trademarks*, 23:20.1 ("If the marks are very similar, it is "only necessary that there be a viable relationship between the goods or services in order to support a holding of likelihood of confusion." *Citing In re Concordia International Forwarding Corp.*, 222 U.S.P.Q. 355, 1983 WL 51828 (T.T.A.B. 1983)). Given the fact that the marks are identical, the degree of relatedness described above is sufficient to warrant finding a likelihood of confusion, or at least raises an issue of disputable fact that should not be considered on summary judgment.

Moreover, Alto incorrectly characterizes Opposer's existing registrations in its argument in paragraph 3. It has not been determined in the Litigation that the 1983 agreement limits Opposer's use of its mark to secure devices for two-wheeled vehicles. The agreement provides for Opposer's use of its mark in connection with *all types* of security devices "without limitation." (See Applicant's Exhibit E.) Thus, Opposer submits that the goods of Alto and Opposer are related enough that confusion is likely from the use of identical marks.

Alto further states that Opposer admits that KRYPTONITE is not a distinctive mark. Alto quotes a statement taken from defendant Kryptonite Corporation's Memorandum in Law in Support of its Motion for Summary Judgment in the D.C. Comics case, stating that "Opposer admits that the KRYPTONITE mark is weak." This is an inaccurate statement. If the Board reviews the cited page from Kryptonite's Summary Judgment Brief, Applicant's Exhibit I, page 16, it will see that Kryptonite makes the argument that *D.C. Comics'* mark KRYPTONITE lacks distinctiveness for a variety of reasons. Kryptonite does not make the argument that its *own mark* KRYPTONITE lacks distinctiveness. The distinctive quality of a mark is considered in light of the goods to which the mark is applied.

Alto also makes the argument that KRYPTONITE has become a generic term and it is now "common place" to use the word KRYPTONITE in connection with all types of products and articles. This "evidence" and these conclusions are misplaced. Simply because the term KRYPTONITE may have other meanings does not render this mark non-distinctive as applied to Opposer's goods. (While GOLD CARD is a generic name for premium level credit card services that does not automatically mean that it is a generic name for check guarantee services of hotel and motel reservation services. *See MasterCard Int'l. Inc. v. American Express Co.*, 14 U.S.P.Q. 2d 1551 (T.T.A.B. 1990) The most commonly cited example is that "apple" is generic when

applied to round red fruit, but is arbitrary when applied to computers. Opposer's mark is at least suggestive when applied to security devices. Moreover, because Opposer owns federal registrations for KRYPTONITE, there exists a strong presumption that the term is not generic; Alto bears the burden of overcoming this presumption and fails to do so. *See Glover v. Ampak, Inc.*, 74 F.3d 57, 37 U.S.P.Q. 1602 (4th Cir. 1996). Under no version of the facts can Alto show that Opposer's mark is generic or descriptive of Opposer's goods.

Alto also argues that, because the purchasers of its goods are sophisticated professionals, likelihood of confusion will not occur. This, however, is not the standard. If the purchasers of both parties' goods are sophisticated purchasers, this is one factor that may be considered by the Board in rendering its opinion on the issue of the likelihood of confusion. The purchasers of Opposer's goods are not sophisticated professionals; rather, they are ordinary consumers. In addition, Alto provides no evidence to support its statement that the purchasers of its goods are sophisticated. Rather, Alto merely makes conclusionary statements that "automobile mechanics are very aware of automobile trademarks." Such arguments should be given little if no weight. Indeed, courts have held in the past that, even if the relevant buyer class is composed of sophisticated experts in the field, this does not necessarily mean that even "experts" cannot be confused by similar marks..." *See Carlisle Chem Works, Inc. v. Hardman & Holden, Ltd.*, 434 F.2d 1403, 168 U.S.P.Q. 110 (C.C.P.A. 1970); *In re Computer Communications, Inc.*, 484 F.2d 1392, 179 U.S.P.Q. 51 (C.C.P.A. 1973). The relative sophistication of the parties' purchasers is therefore another contested issue of material fact in this proceeding.

As stated above, Alto's arguments that: (1) Opposer cannot bridge the gap, (2) Alto always operates under a good faith standard, and (3) Alto produces high quality products are irrelevant to the determination of likelihood of confusion under the *DuPont* factors. Further, the

“argument” made in these sections consists of conclusory statements with no supporting evidence or basis in this proceeding. Alto’s good faith and product quality have no evidentiary support and therefore are contested issues of material fact.

For the above reasons, Alto’s summary judgment motion should be denied.

II. Opposer’s Response to Alto’s Motion to Compel Discovery

Alto contacted Opposer on May 5, 2005, conveying that Alto was unable to obtain the documents requested in its Fourth Request for Documents and Things directly from the clerk in the Southern District of New York. Opposer did not question Alto’s efforts to obtain these documents at that time¹; rather, Opposer immediately agreed that it would take steps to obtain these documents from counsel representing Opposer in the D.C. Comics litigation.² When Jonathan Moskin, Opposer’s Litigation counsel, did not respond with the requested documents. Lori Meddings sent a follow-up email to Mr. Moskin on June 6, 2005, to which he immediately replied that the documents would be forthcoming. Opposer has continually taken steps to obtain the requested documents for Alto. Opposer is not sure why Alto has filed this Motion to Compel Discovery when Alto has taken no steps to follow-up with Opposer to obtain the requested documents. Further, Opposer submits that only a short period of time has passed since its last conversation with counsel for Alto about this issue. Indeed, Alto’s Fourth Request for Production of Documents was not served until the last day of discovery in this case. Opposer filed responses to Alto’s Fourth set of requests on May 3, 2005, and contacted Opposer’s counsel in the D.C. Comics case, Mr. Moskin, a mere two weeks later. This is hardly gross deficiency in

¹ After receiving the subject motion, Opposer contacted the clerk for the United States District Court for the Southern District of New York to determine whether the declarations sought by Alto are publicly available. The clerk informed Opposer that such documents are available from the Court. See Declaration of Chantelle Stocco.

² Jonathan Moskin of Whites Case LLP of New York, New York, agreed on May 15, 2005, to supply the requested declarations to Alto. See Applicant’s Exhibit E.

responding to Alto's document requests. As soon as Opposer's counsel receives the documents, she will forward copies to Alto's counsel.

Accordingly, Alto's Motion to Compel should be denied.

III. Response to Applicant's Motion to Stay Proceedings

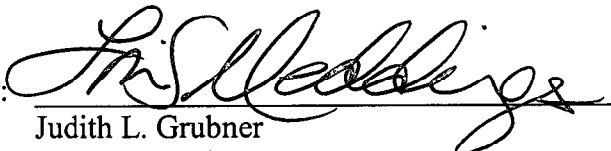

Opposer submits that Alto's Motion to Stay Proceedings should be denied. The D.C. Comics Litigation is not germane to the present proceeding. Opposer owns valid registrations for the mark KRYPTONITE that are not the subject of cancellation requests in the Litigation. Opposer admits that some of its registrations for KRYPTONITE and for the KRYPTO-form of its marks may be at issue with respect to the D. C. Comics Litigation. However, Opposer's registrations for the KRYPTONITE mark for use in connection with security devices of all types are not at issue in that proceeding and thus it would be improper to stay the present proceeding pending the outcome of that litigation.

CONCLUSION

Opposer respectfully submits that Alto's Motion to Compel Discovery, Motion for Summary Judgment and Motion to Stay Proceedings should all be denied.

Dated July 6, 2005.

DECLARATION OF CHANTELE W. STOCCO

I, Chantelle W. Stocco, hereby declare under penalty of perjury as follows:

1. I am a paralegal with the law firm of Michael Best & Friedrich LLP.
2. On June 9, 2005, I called and spoke with a Records Management clerk at the U.S. District Court for the Southern District Court of New York to find out what the process is to get copies of documents that were filed with the court.
3. I was informed by the Records Management clerk that copy requests could be made in person, made in writing or a copy courier could personally come in to the court to make the copies.
4. I then specifically asked the Records Management clerk if I could get a copy of docket numbers 23, 24 and 39 from the case *D.C. Comic v. Kryptonite Corporation*; U.S. District Court for the Southern District of New York Case No. 00CV05562. The Records Management clerk said that I could get copies of those documents. I was informed that all papers filed with the court are available for copying unless a document is filed under seal.

Dated: June 10, 2005.

KRYPTONITE®

AUTOMOTIVE SECURITY

Kryptonite, manufacturer of the world famous high security U-shaped bicycle and motorcycle locks, offers the strongest, easiest to use and most compact automotive security locks on the market. Made with the same integrity and craftsmanship as Kryptonite's other quality products, the hardened steel Steering Wheel Lock and Car Lock will resist prying, smashing, sawing, freezing and bolt cutting. For unmatched product quality and exceptional customer service, there's one choice – Kryptonite.

Steering Wheel Lock

- ▶ "Closed Loop Protection System" stops thieves' tools.
- ▶ Strong hardened steel construction with highly visible, vinyl protective coating.
- ▶ Patented deadbolt offers 4 tons of pull-strength.
- ▶ Pick and drill-resistant tubular locking cylinder.
- ▶ Fits most cars, vans and pick-up trucks.
- ▶ Great for vehicles with airbags.
- ▶ State-of-the-art compact design.
- ▶ FREE \$500 anti-theft guarantee. (USA only)

Fits steering wheel with inside diameter up to 14.5" (36.83 cm). Weighs only 3 lbs (1.36 kg).

Car Lock

- ▶ Strong hardened steel construction with highly visible, thick vinyl coating.
- ▶ Pick and drill-resistant tubular locking cylinder.
- ▶ Fits most cars, trucks, vans and RV's.
- ▶ Below dashboard installation.
- ▶ Great for vehicles with airbags.
- ▶ FREE \$500 anti-theft guarantee. (USA only)

Compact design reduces to a portable 23.5" (59.69 cm) and expands to a maximum of 29.25" (74.29 cm). Weighs only 3.5 lbs (1.59 kg).

CAR CARE

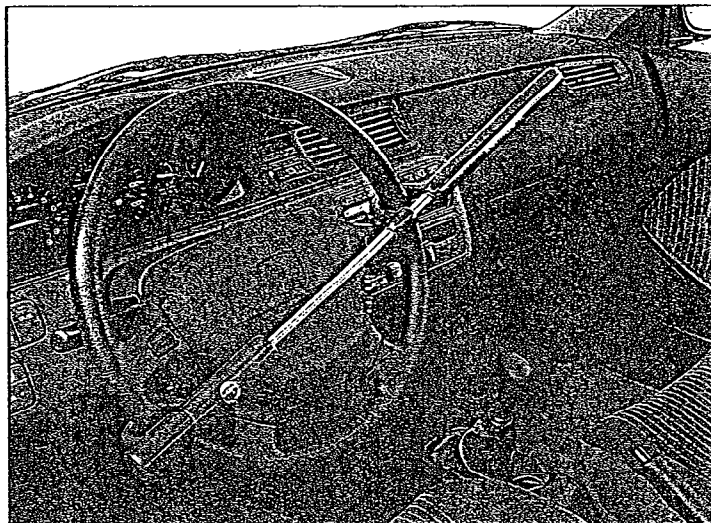

BY RIK PAUL

THE YEAR'S 10 MOST INNOVATIVE CAR-CARE PRODUCTS

Over a year's time, we're deluged with product releases of every variety, and we get to try out a number of the more interesting and promising designs. Some work well, others need a little more time on the drawing board.

A rare few display true innovation. Here we've put together 10 of the best and most innovative car-care products we've come across in the last year. Each, in its own way, makes life with your vehicle a bit easier.

LOCK OUT In the bicycle field, Kryptonite locks have been *the* lock for years. Now, the company has introduced an innovative new steering-wheel lock that deserves serious consideration for the security challenged. In designing the lock, Kryptonite took a look at the most common methods thieves use to defeat other steering-wheel locks and designed the product accordingly. It completely encircles the steering wheel in two places. The hardened-steel shaft resists sawing, cutting, and freezing, and the tubular key system is pick- and drill-resistant. We've used a prototype model on test cars for about six months. It's not as quick to install as other models, but we've been impressed with its design and construction. Kryptonite also offers 24-hour key replacement, rekeying service, and a \$500 guarantee (applied toward the owner's insurance deductible). \$89.99.

KRYPTONITE ENTERS AUTOMOTIVE AFTERMARKET WITH INNOVATIVE NEW STEERING WHEEL LOCK

CANTON, MA, October 21, 1994 -- Kryptonite Corporation, best known for manufacturing and marketing the highest quality bicycle locks in the world, brings their legendary commitment to technology into the automotive aftermarket. The Kryptonite Steering Wheel Lock represents the "next generation" of security in Kryptonite's family of products. This new mechanical security device boasts a patented "closed loop" system that "handcuffs" the steering wheel in two places - thus immobilizing a vehicle's steering wheel and reducing the likelihood of vehicle theft. Made with the same integrity and workmanship as Kryptonite's bicycle and motorcycle locks, the Kryptonite Steering Wheel Lock offers the maximum protection in automotive security.

"With the growing popularity of mechanical automotive devices, Kryptonite recognized the need for high-security car locks - locks that would resist leverage and saw attacks," said Peter Zane, President of Kryptonite Corporation. "The Kryptonite Steering Wheel Lock achieves serious security through design, material selection, and quality workmanship. In fact, *Motor Trend* Magazine named the Steering Wheel Lock "one of 1993's most innovative car care products."

The Kryptonite Steering Wheel Lock fits most cars, pick-up trucks, and vans. It also accommodates vehicles with airbags. The lock runs across the steering wheel and features a unique "closed loop" locking system which provides maximum security against leverage attacks. Made of case hardened steel and boasting a 7-pin, tubular locking cylinder, this lock can resist violation from saws, wrenches, drills, hammers, bolt cutters, pry bars, and freezing agents. This state-of-the-art compact design fits steering wheels with inside diameters of up to 14.5 inches, and it weighs only 4 pounds.

In addition to the Steering Wheel Lock, Kryptonite offers a Brake To Wheel Lock, which renders the vehicle inoperable by disabling both the steering wheel and the brake pedal. So impressive is the strength and handling of the Brake To Wheel Lock that Germany's *automotor und sport* Magazine named it "...the one clear favorite..." of all security devices tested. Both the Brake To Wheel Lock and the Steering Wheel Lock are made in the USA.

The exclusive customer services offered on the Steering Wheel Lock and the Brake to Wheel Lock are unparalleled within the industry, and customer service representatives are available in Kryptonite's Massachusetts headquarters by telephone. Both locks are guaranteed against theft, and Kryptonite will pay the product's owner up to \$500 against their car insurance deductible. Kryptonite offers 24-hour key replacement to customers who have lost keys and have recorded or registered their key number through Kryptonite's free lifetime key registration service. These locks can also be ordered keyed-alike to bicycle and motorcycle locks in the Evolution series and the K-4 series.

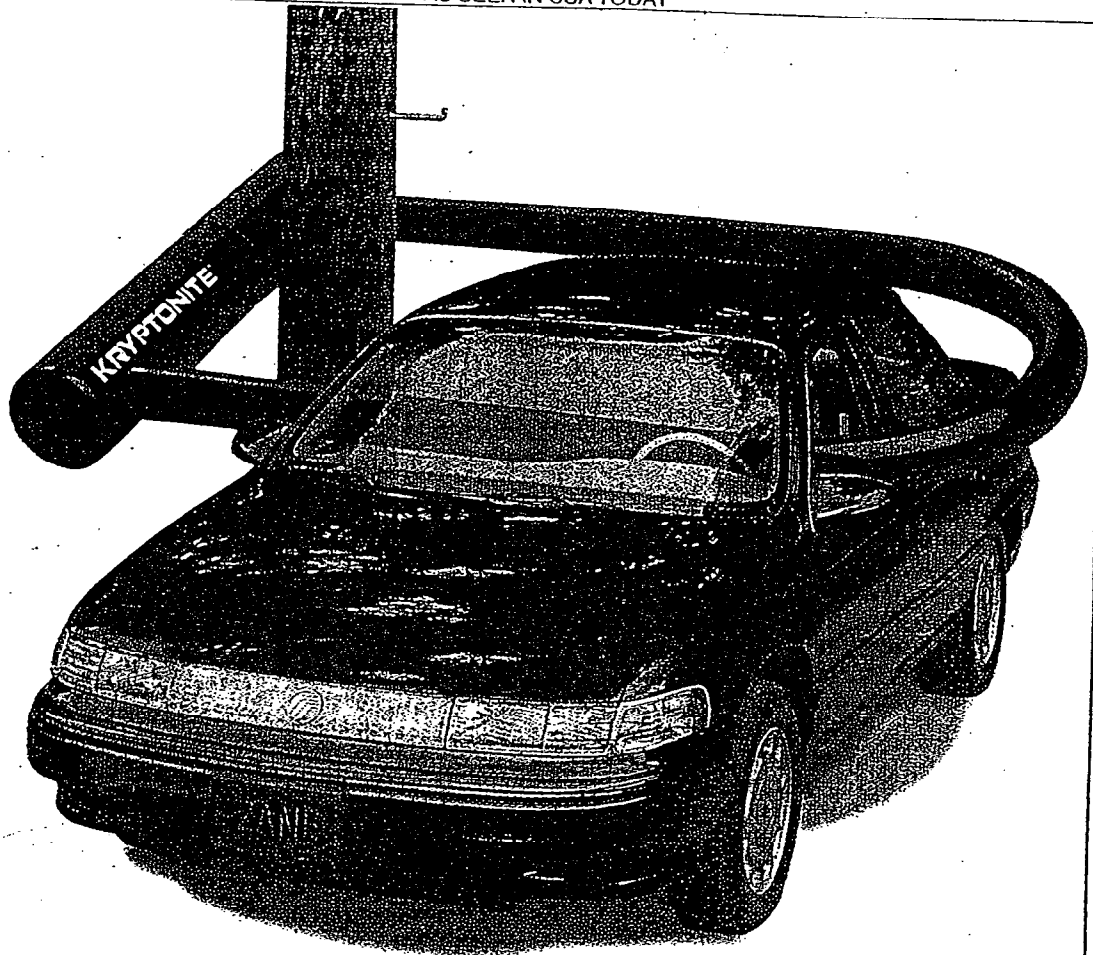

Kryptonite automotive security products are sold through select automotive accessory retailers, mail order catalogs, service establishments, and directly to consumers through Martha's Vineyard Trading Company at 1-800-821-6286. Suggested retail for both the Kryptonite Steering Wheel Lock and Kryptonite Brake to Wheel Lock is \$89.95 each.

Kryptonite Corporation, based in Canton, MA, manufactures an extensive line of high-quality security products for the bicycle, automotive, motorcycle, and sporting goods markets. 1994 marks Kryptonite's 24th year of producing the highest quality vehicle locks in the world.

Crook Locks - One Clear Favorite

KRYPTONITE

Price: DM 249

Hardened steel with plastic sleeve, cannot be sawn or cut through. Extremely strong lock. Easy handling. No loose parts.

CARLOCK

Price: DM 40

Hardened steel, cannot be sawn or cut through. Lock can be drilled with some effort. Lock casing can be sawn off. Unit can fall apart.

AUTO-SAFETY

Price: DM 50

Upper and lower metal rod easy to saw or cut through. Casing can be levered open with a screwdriver. Fits into glove compartment. Unit can fall apart.

STEERING WHEEL LOCK

Price: DM 22

Easy to saw or cut through, lock easy to drill open. Unit falls apart easily, and its sharp edges could damage steering wheel.

HOOK

Price: DM 25

Easy to saw or cut through, lock easy to drill open. Unit falls apart, and its sharp edges could damage steering wheel.

Locksmiths find vehicle to success

By DAVID CALLAWAY

WHEN it comes to bicycle security, Kryptonite Corp. has the business all but locked up.

For more than 15 years, the Boston-based vehicle security company has helped protect more than a million bicycles and motorcycles here — the vehicle theft capital of the country — and around the world.

Now Kryptonite has entered the lucrative automobile security market with a new type of lock that latches the brake pedal to the steering wheel.

Although the \$70 car lock is new, Kryptonite owner Michael Zane believes it will catch on just as quickly as his famous horseshoe-shaped bicycle locks. "Boston is just as notorious as a car theft capital as it is a bike theft one," Zane said. "But here, when people have a problem, they do something about it."

Zane said he is not afraid of getting into an already crowded car lock market because he believes his locks — although the design is not original — are the safest around.

And with more than 1 mil-

lion cars reported stolen yearly in the United States — about one every 31 seconds — according to the FBI, Zane said he thinks the market is there, especially when the average alarm systems sell between \$400 and \$500.

Zane founded Kryptonite in 1971, after reading about a new type of steel bicycle lock being used in Cambridge. He contacted the designer, Stan Kaplan, and with only \$1,000, the two of them went into business.

Although Kaplan soon tired of day-to-day business and left the company, Zane continued to hawk the unique horseshoe-shaped locks. He said he remembers piling into a 1970 Volkswagen van with a few hundred of them and driving cross-country as his own salesman.

Zane still drives a Volkswagen van, but today his new and improved two-pound locks are sold through distributors throughout the United States and in 20 foreign countries.

"The company really began to take off in 1976, when we came out with our flagship K-4 'bike lock,'" he said.

HEAVY DUTY: Peter and Michael Zane display some of the Kryptonite products.

Zane's brother Peter joined the firm in 1978 and his father and mother both work in production.

Peter, who is now president, attributes the success with the locks to the company's use of flat stainless steel, a substance that can not be cut through with ordinary boltcutters.

Although the Kryptonite locks are more expensive than a traditional chain lock — they cost about \$30 — bicycle stores say their sales show that customers think they are worth it.

Kryptonite's biggest rival, Citadel, which is owned by Rhode Gear USA in Providence, has a competing horseshoe bike lock, although several bicycle stores said Kryptonite's name, plus a better quality steel, help it to keep a wide lead over Citadel.

"We sell maybe 10 boxes of Kryptonite for every other lock we sell," said Denise MacDonaid of Wheelworks in Cambridge.

The Zane brothers plan to

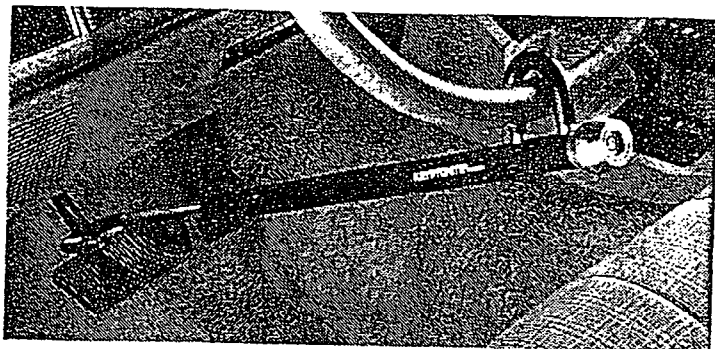

expand their business, but slowly. They said they still receive most of their revenue from the flagship bicycle lock which won an award last year in Japan for best foreign design. Among the other winners were Apple computers and Porsche automobiles.

"We want to do what we do best and that is find a niche and run with it," said Zane. "They're still all kinds of things being stolen so we have a lot to choose from."

Your Wheels

More Than One Way to Steer Away Car Thieves

By RALPH VARTABEDIAN, *Times Staff Writer*

Question: My car was recently stolen, despite having an expensive alarm system. I have replaced the car and again have an alarm system, but I am a lot less naive now. I am considering a steering wheel lock and am wondering what you can tell me about them. Would use of such a lock rule out a car theft?

—A.U.

Answer: More than 1 million cars are stolen from Americans every year, a staggering loss by any measure and a sad commentary on lawlessness in our society.

All it takes is a few simple tools and less than a minute of time.

Auto alarms can help, but there is no certain method to stop a determined thief.

If you own a fancy car that is a target for car thieves or park in a high-crime area, you are likely at some time to consider an anti-theft system. Steering wheel locks are

an obvious deterrent you will want to consider.

I recently had an opportunity to evaluate a steering wheel lock. Although it may seem like a tedious chore to attach the lock several times a day, it is probably less of a hassle than finding an empty space where you once left your car parked.

An experienced auto thief can easily defeat the steering-column locks that are standard equipment on almost all new cars. All it takes are a few simple tools and less than a minute of time.

Steering wheel locks disable a car by preventing the car from being steered once the thief has broken the ignition-locking system on the steering column. What it does not do is offer a deterrent to a thief who wants to steal a radio or a briefcase. If you want to protect a radio, a car alarm may be a better choice.

Most steering wheel locks hook around the brake pedal and attach to the steering wheel. The locks come in all different qualities, and a pleasant surprise for American mo-

torists is that higher quality locks are built in the United States.

The lock I evaluated was from the Kryptonite Corp. of Boston, makers of the now-famous Kryptonite bicycle lock, which features a hardened-steel shank and tubular-locking mechanism.

I found the lock easy to use. The Kryptonite lock can permanently adjust to any length required from the brake pedal to the steering column by an unusual screw mechanism. This seems to be an advantage over the locks that must be adjusted during each use.

Kryptonite President Peter Zane said the entire lock is made of hardened steel and cannot be cut with a hacksaw or a bolt cutter. Zane said the imported models he has tested can be cut, and some of the flimsier ones can be bent or broken by hand.

The Kryptonite lock costs \$89.95. The cheaper imported locks, which do not have the tubular lock or hardened shank, are sold in discount auto stores for as little as \$12.

A steering wheel lock won't stop a professional thief intent on getting your car, but it will slow him down enough that he may find an

Some of the flimsier ones can be bent or broken by hand.

easier target. How determined are thieves? Some will saw off the brake pedal to remove a steering wheel lock and drive without the pedal, Zane said.

The Kryptonite lock attaches with a locked loop around the steering wheel, whereas the cheaper ones simply hook on. That means that even if the brake pedal is sawed, it would still make the car undrivable.

If you buy a Kryptonite and your car is stolen, the company will pay your insurance deductible up to \$500. Zane claims that so far no car has been stolen while it was locked with his steering wheel lock.

KRYPTONITE®

CABLE LOCKS

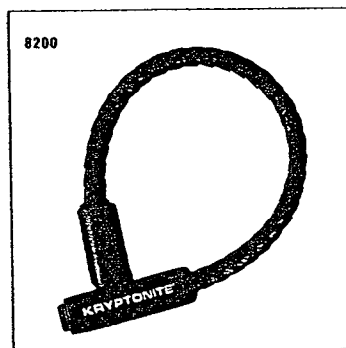

Cable locks vs. U-locks? Cable locks offer flexibility with less overall security. U-locks provide greatest security at the expense of limited flexibility.

Kryptonite's three levels of cable security are: *good* for lower crime areas, *better* for moderate crime areas and *best* for high crime areas and maximum security lock-up situations.

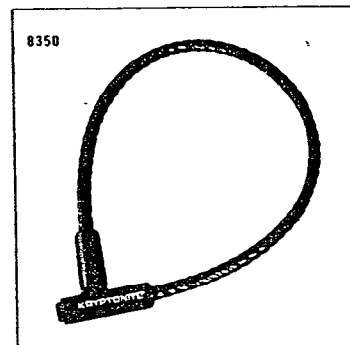

BEST

8000 Series Cable Locks

- ▶ Maximum security with extra thick U-lock housing; tested to withstand 15,000 lbs (6.80 metric tons) of pull-strength.
- ▶ Pick-resistant, tubular keyway.
- ▶ Easy to use with swivel locking heads.
- ▶ Vinyl covered cable with over 200 steel strands.
- ▶ Great for bicycles, mopeds, scooters and motorcycles. Can be used to secure sports equipment, lawn and garden equipment, ladders, gates, tools and barbecue grills.

8200

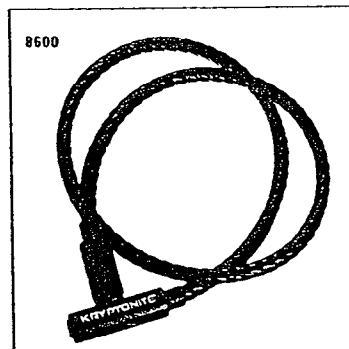

8350

8200

Dimensions:
2" x 0.8"
(50.96 cm x 20 mm)
Weight:
3.6 lbs (1.6 kg)

8350

Dimensions:
3.5" x 0.8"
(106.68 cm x 20 mm)
Weight:
4.3 lbs (1.9 kg)

8600

8600

Dimensions:
6" x 0.8"
(182.88 cm x 20 mm)
Weight:
6.4 lbs (2.9 kg)

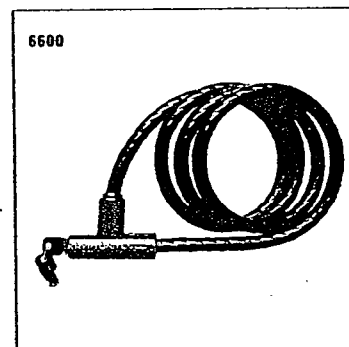

BETTER

6000 Series Cable Locks

- ▶ High strength aircraft cable; tested to withstand 2,200 lbs (1 metric ton) of pull-strength.
- ▶ 7-pin tubular, locking cylinder.
- ▶ Vinyl covered to prevent scratches and dents.
- ▶ Great for bicycles, mopeds, scooters and motorcycles. Can be used to secure sports equipment, lawn and garden equipment, ladders, gates, tools and barbecue grills.

6200

6600

6200

out dirt and moisture;
with carrying bracket.

EXCLUSIVE CUSTOMER SERVICES

Available to the distributor, dealer or consumer through Kryptonite's Customer Service department. Pricing for these services is available upon request.

Key replacement. If you know your key number or have registered your key number with us, keys will be mailed out within 24 hours of receipt of the order.

Lifetime key registration. Upon registration, customer key numbers are entered into our computer for easy access.

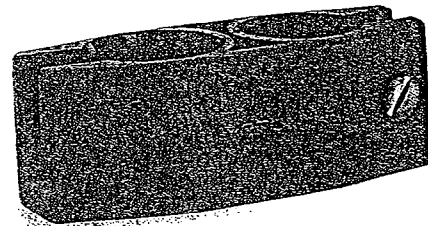

Keyed-alike. Available for all U-locks and cables with tubular key mechanisms. Evolution Locks can only be keyed to other Evolution Locks. Rock Locks can only be keyed to other Rock Locks.

KRY 000660

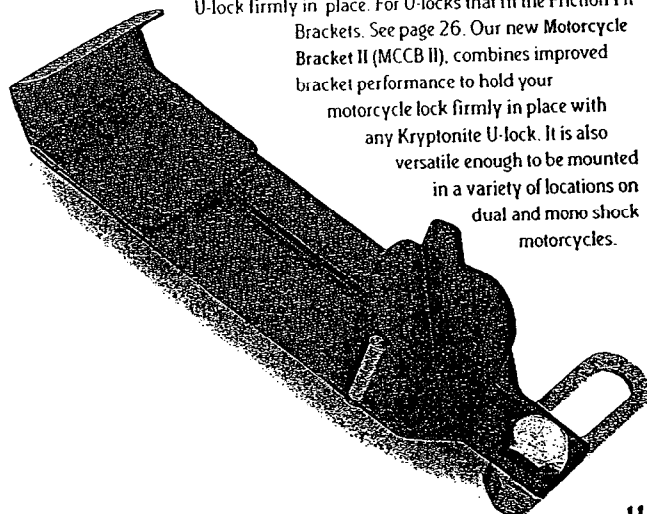

A NEW PRODUCTS REVIEW...

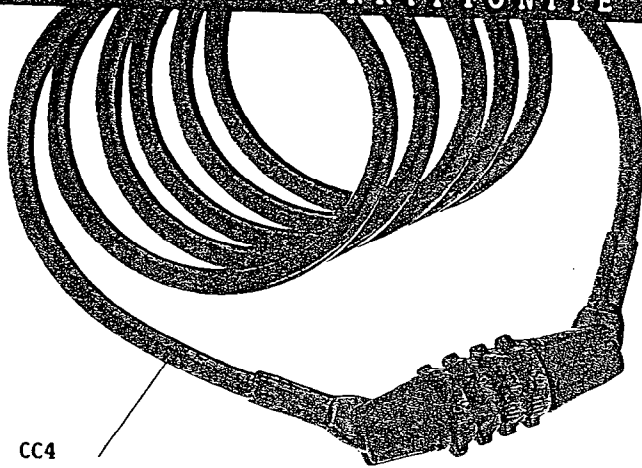

At Kryptonite, our goal is to meet the ever-changing demand of consumers for new choices and new solutions to security needs. For this reason, we've developed a number of new products for all levels of security. Here, at Kryptonite, we monitor the bicycle market and bicycle theft statistics to offer the most effective theft deterrent possible. In addition, we work with the Crime Prevention programs of police departments and university officials worldwide to develop the best products possible for a reasonable price.

NEW BRACKETS The Friction Fit Brackets offer convenience of no moving parts and improved bracket performance to hold your U-lock firmly in place. For U-locks that fit the Friction Fit Brackets. See page 26. Our new Motorcycle Bracket II (MCCB II), combines improved bracket performance to hold your motorcycle lock firmly in place with any Kryptonite U-lock. It is also versatile enough to be mounted in a variety of locations on dual and mono shock motorcycles.

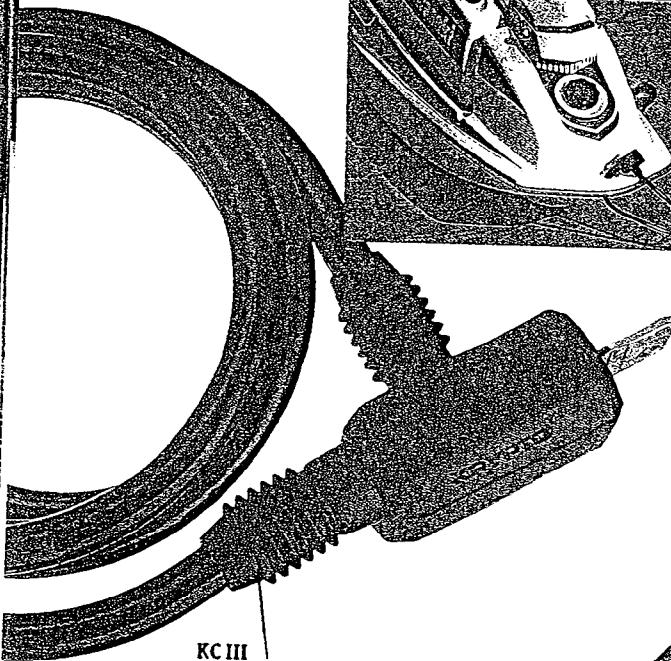

KRY 000697

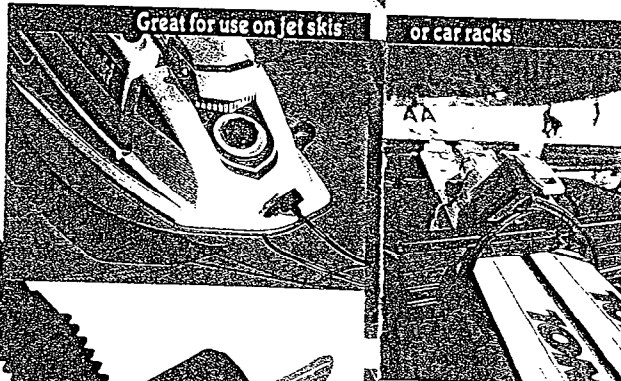

CC4

This convenient resettable combination cable is great for use as a front wheel lock, a seat lock or a bicycle and motorcycle helmet lock.

KC III

The KC III features convenience and security all in one with a snap-shut locking mechanism, a protective keyway shutter door, flexible cable guards and vinyl covering that won't scratch your bike.

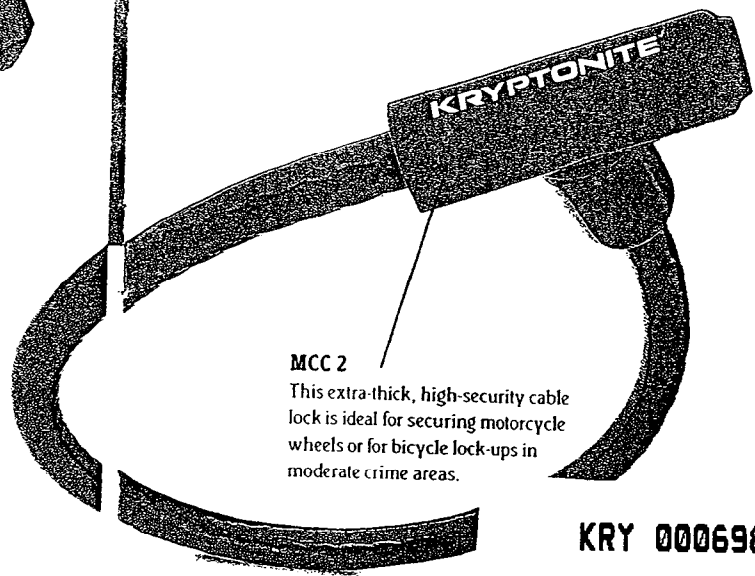

Great for use on jet skis

or car racks

RCL

Set your own personal 4-digit combination of a lucky number, your birthday or phone number with this 6-foot vinyl-coated cable.

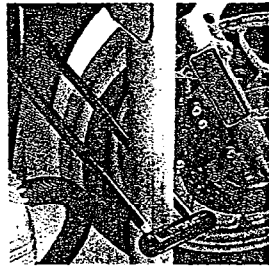

MCC 2

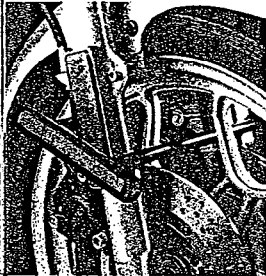

This extra-thick, high-security cable lock is ideal for securing motorcycle wheels or for bicycle lock-ups in moderate crime areas.

RECOMMENDED MOTORCYCLE LOCK-UP

The best way to get maximum security from your Kryptonite lock is to secure the bike's frame to an immovable object like a parking meter or a sturdy signpost. When

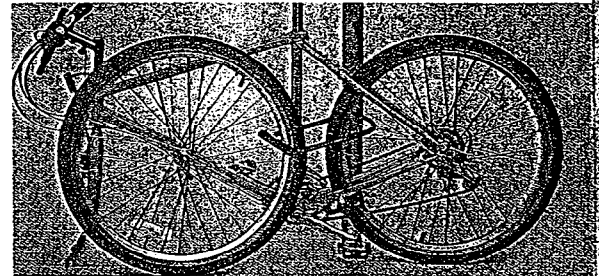

the recommended lock-up is not possible, locking the front wheel and forks together is a good and relatively secure alternative.

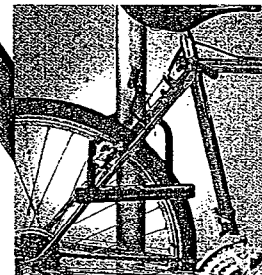

RECOMMENDED BICYCLE LOCK-UP

With cable locks, wrap the cable tightly around your bicycle or motorcycle and the fixed object, keeping the locking attachment as high above the ground as possible.

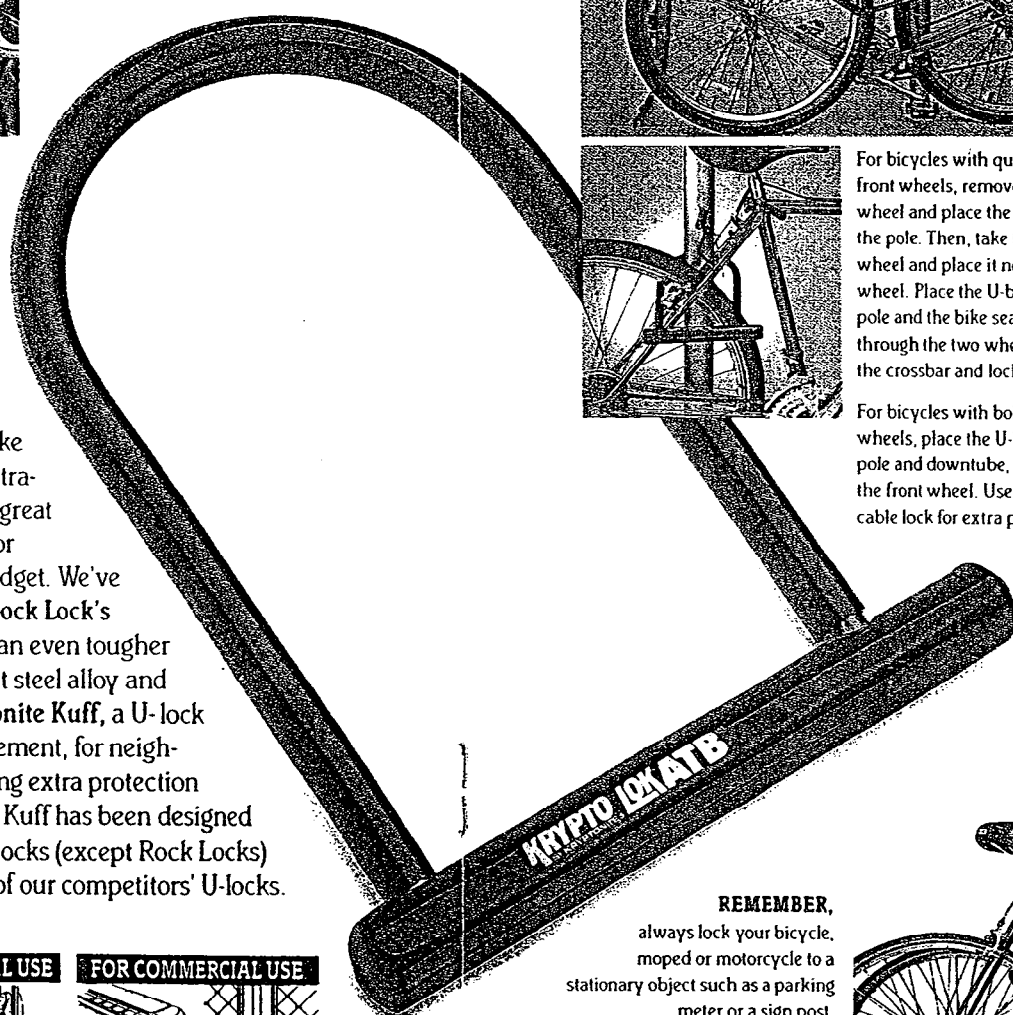

For bicycles with quick-release front wheels, remove the front wheel and place the bike against the pole. Then, take the front wheel and place it next to the rear wheel. Place the U-bar around the pole and the bike seat tube and through the two wheels. Attach the crossbar and lock it.

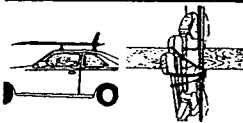

For bicycles with bolt-on front wheels, place the U-bar around the pole and downtube, and through the front wheel. Use a Kryptonite cable lock for extra protection.

NEW LOCK PROTECTION

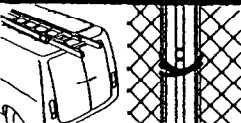

The KL ATB, our new mountain bike U-lock with its extra-wide shackle is a great buy for students or bicyclists on a budget. We've also refined the Rock Lock's steel to offer you an even tougher and more resilient steel alloy and added the Kryptonite Kuff, a U-lock crossbar reinforcement, for neighborhoods requiring extra protection and security. The Kuff has been designed to fit all of our U-locks (except Rock Locks) and virtually all of our competitors' U-locks.

FOR RECREATIONAL USE

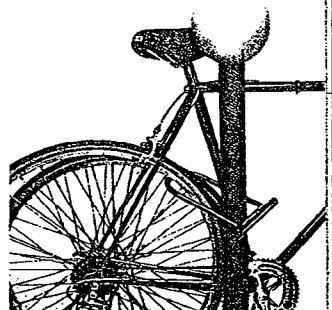

FOR COMMERCIAL USE

REMEMBER,
always lock your bicycle,
moped or motorcycle to a
stationary object such as a parking
meter or a sign post.

OR . . . look for Kryptonite's
newly developed parking system,
the Kryptonite PARKCYCLE.

We've applied our proven U-lock technology to the special needs of automotive security. We made the shackle smaller, so it clamps easily over the steering wheel ring. And we lengthened the crossbar and

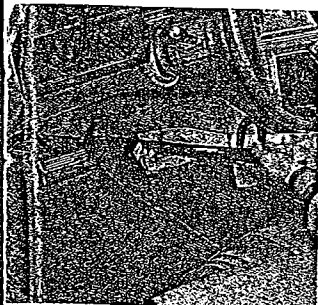

fig. 1

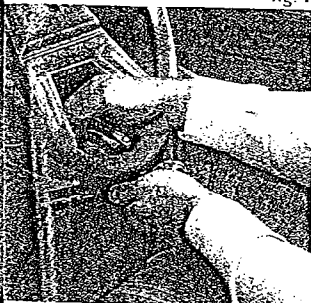

fig. 2

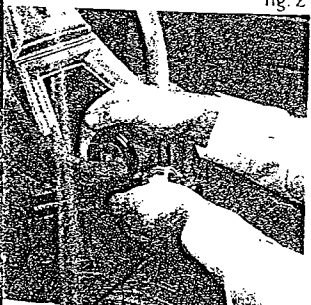

fig. 3

Thick high carbon hardened alloy steel stops cutting and smashing tools.

added an adjustable hook that grabs the brake or clutch pedal. Best of all, there's no costly or complicated installation needed, and no risk of fouling your car's electrical system. Just attach the Kryptonite Car Lock to the brake pedal and steering wheel when you leave your car. Remove it and store it under your seat when you return.

Easy one time adjustment

Place hook snugly around brake or clutch pedal arm and pull the long shaft toward you until it stops. While keeping tension on the lock shaft by continuing to pull back on it, adjust length of lock by rotating lock shaft counter clockwise to lengthen until shackle aligns with steering wheel. See fig. 1.

How to use

1. Turn steering wheel to locked position. For vehicles with tilt steering wheel, set wheel at lowest position. Place hook firmly around brake or clutch pedal and pull lock out to pre-set length. See fig. 1.
2. Insert key and open shackle. See fig. 2.
3. Close shackle over steering wheel and rotate key 180° left to secure. See fig. 3.

Pick resistant Ace II tubular locking mechanism. Stops drills and hole saws, too. Can be keyed-alike to other Kryptonite locks.

Precision engineered keyway for smooth operation.

Easy to open and close. The shackle is hinged and permanently anchored to the crossbar.

Rotating metal cuff makes it virtually impossible to "pop" the keyway out of the lock.

Adjust from a minimum length of 23 1/4" to a maximum length of 29 1/4" (Reduces to 22" for easy storage.)

Thick vinyl covering protects painted surfaces.

... from *Automobile Magazine* on automotive security ... "If your first concern is that the car itself not be stolen, take a cue from New York City's cycle messengers. They have to leave their bikes — their means of earning a living — in the street while making deliveries. For the most part, they secure their bikes with Kryptonite (the lock, not the material Superman feared). For cars, there is a Kryptonite bar that locks the steering wheel to the brake pedal and renders both immobile. Similar devices have been around for years, but Kryptonite's reputation in a particularly tough market, along with the product's elegant and simple design, makes it the lock of choice." ... and from Kryptonite, an exclusive anti-theft guarantee — pays the "deductible" up to \$500, if your car is stolen. Call or write for details.

THE PROBLEM:

Property Theft—Tools and equipment are the major targets. Items like lawnmowers, gas grills, generators and power tools. Why? Because they're expensive and easy-to-steal, especially when left unsecured. Theft costs homeowners and contractors billions of dollars every year. Statistics* show that in the U.S.:

- A property theft occurs every 4 seconds
- A home is burglarized every 12½ seconds; average homeowner loss is \$1350
- Approximately 2% of the total value of construction jobs are lost to theft; average business loss is \$1300
- Nearly 60% of stolen property is never recovered

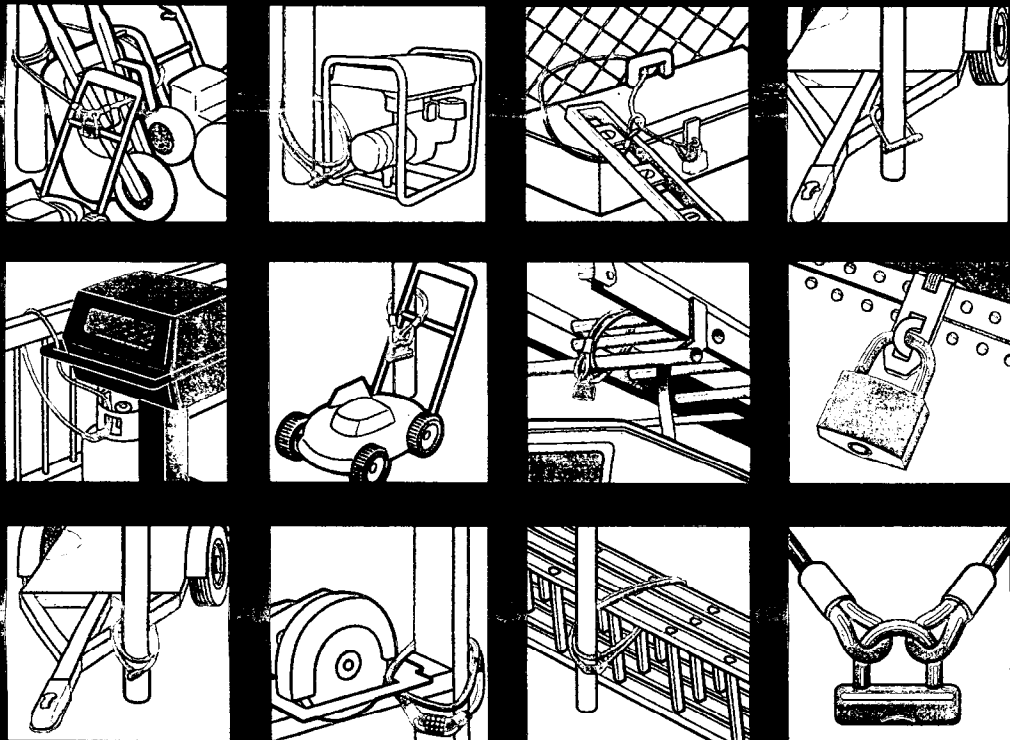

THE SOLUTION:

Kryptonite® Flex Security™. Securing property with a high-quality lock is the best way to protect against theft. Kryptonite® Flex Security™ is a complete, integrated system of high-security cables, chains and padlocks designed to be **tough** on thieves, yet easy to use. Kryptonite® has been a leader in developing innovative locks and security devices since 1971. We know security. Our Flex Security products are specifically designed for home and job site use. They're conveniently flexible and mobile, and can be used outdoors, in all conditions. Flex Security provides serious security solutions for the tough world we live in.

- Tools and equipment are the major targets. Items like generators, power tools, lawn equipment and gas grills. Why? Because they're expensive and easy to steal, especially when left unsecured. Theft costs contractors and private homeowners billions of dollars every year.

- Nearly 60% of stolen property is never recovered
- Approximately 2% of the total value of construction jobs are lost to theft; average business loss is \$1300
- A property theft occurs every 4 seconds

Tough World, Tough Locks

Securing property with a high-quality lock is the best way to protect against theft.

Kryptonite Flex Security is a complete, integrated system of high-security cables, chains and padlocks designed to be tough on thieves yet easy to use. Designed for job site or home use, they're flexible and mobile and are always weatherproof. Flex Security provides serious security solutions for the tough world we live in.

LOCK IT OR LOSE IT.

KRY 001478

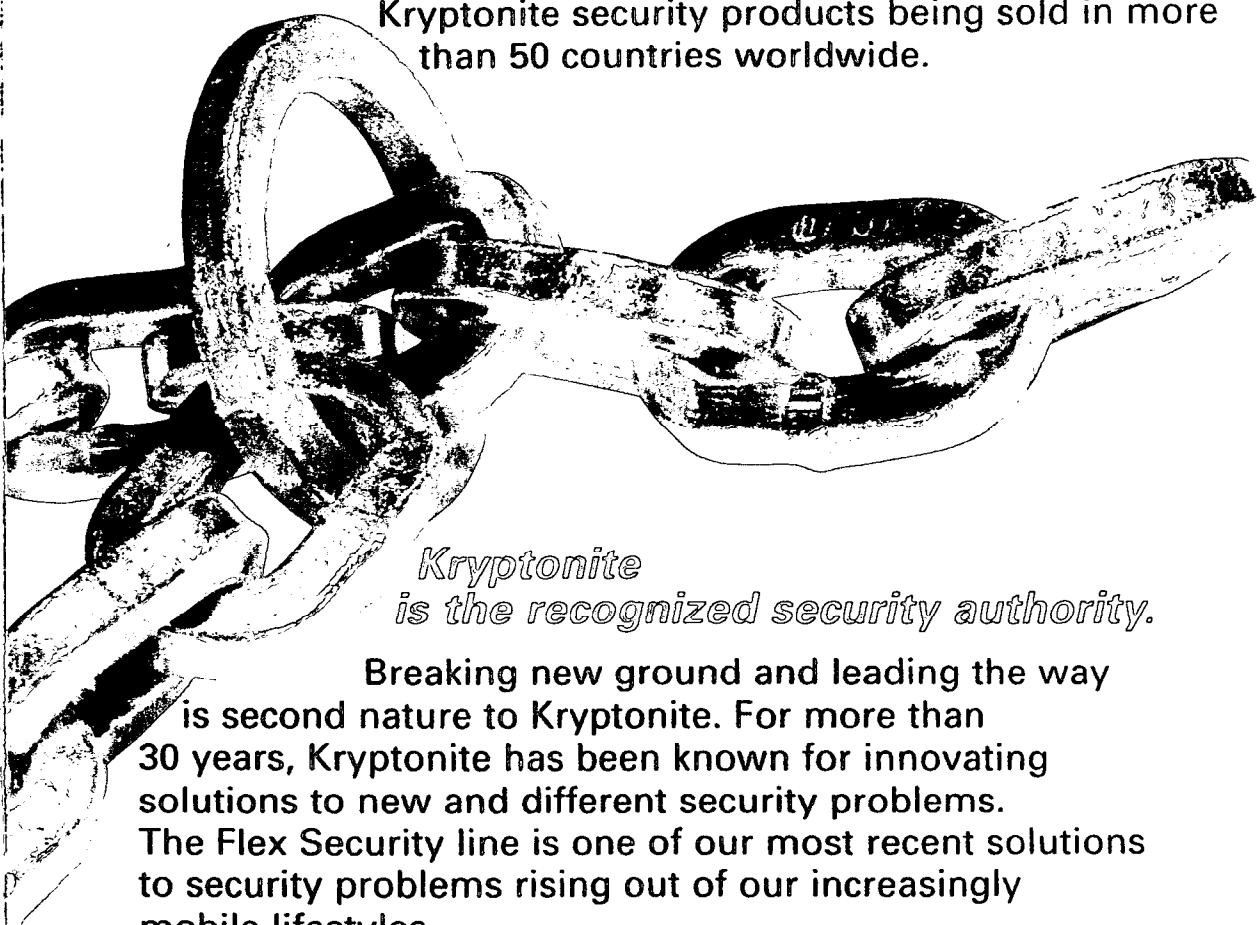

Tough World, Tough Locks

Why choose Kryptonite Flex Security Products?

Kryptonite is the security brand more people have known and trusted since 1971.

Creators of the bicycle security category with the introduction of their first U-lock, Kryptonite bicycle locks are now the most widely recognized and recommended locks nationwide.

Kryptonite launched motorcycle security in 1974 and today dominates the U.S. powersport security market. You can find Kryptonite security products being sold in more than 50 countries worldwide.

*Kryptonite
is the recognized security authority.*

Breaking new ground and leading the way is second nature to Kryptonite. For more than 30 years, Kryptonite has been known for innovating solutions to new and different security problems. The Flex Security line is one of our most recent solutions to security problems rising out of our increasingly mobile lifestyles.

With a continued focus on making our existing products stronger and more flexible; and a continued focus on innovating new security solutions, like our StrongHold Security Anchors, Kryptonite remains the *True Security Authority*. Kryptonite quality and security is the benchmark against which all others are measured.

KRYPTONITE

*Best, Better, Good
or Specialty...*

It just makes sense that you
wouldn't use the same type of
security product to secure a
\$5,000 generator on a job site
that you might use to secure a
\$50 power saw in a home
workshop or garage.

Kryptonite Flex Security products
offer the right level of security
for everything you need to secure
and everywhere you need to
keep your property safe.

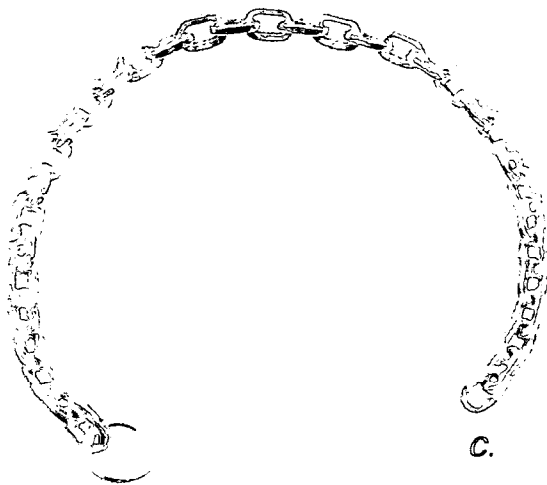

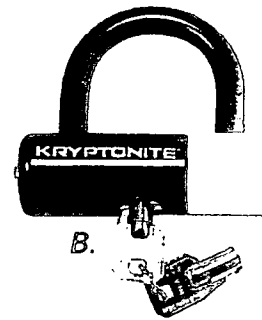

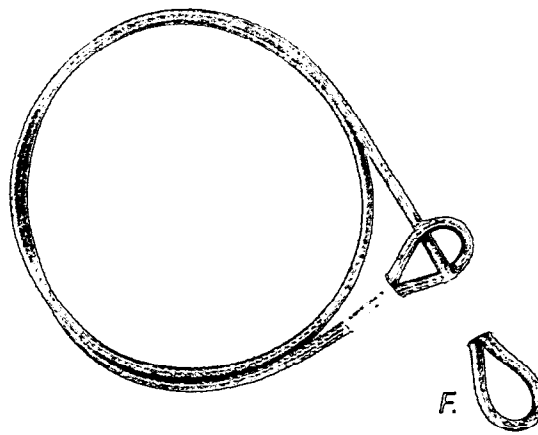

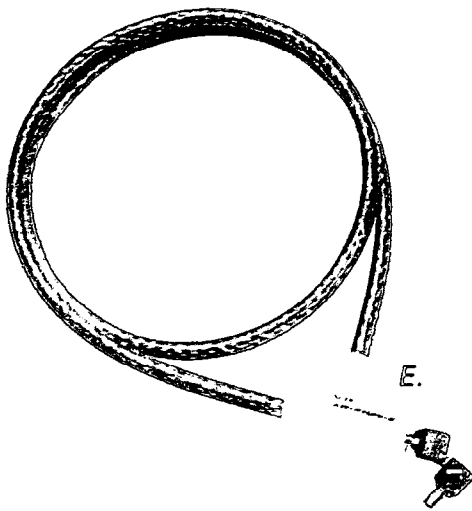

FLEX SECURITY™

*All Kryptonite Locks are Weather-Resistant,
have a Lifetime Key Registration,
Key Replacement Service,
and a Lifetime Warranty.*

KRY 001480

A. Chain & Padlock Chain is triple heat-treated Boron Manganese steel with a unique trapezoidal-shaped link that resists attacks from bolt cutters, saws, hammers and chisels. Sold with Our Strongest Padlock described below.

#810209 5' 6" chain and padlock

#810100 3' chain and padlock

B. Our Strongest Padlock Padlock features case-hardened, vinyl coated 1/2" Kryptonium™ steel shackle and withstands thousands of pounds of cutting force. High grade steel, 7-pin pick and drill resistant tubular cylinder.

#820604 1/2" diameter shackle

C. Cinch Ring Security Chain Chain is triple heat-treated Boron Manganese steel with a unique trapezoidal-shaped link that resists attack from bolt cutters, saws, hammers and chisels. Cinch ring design for more useable length and ease of use with Kryptonite padlocks or virtually any high security padlock.

#810223 4' x 3" chain

#810230 2' x 3" chain

D. Removable Shackle Padlock Padlock features case-hardened 1/2" steel removable shackle. 7-pin pick and drill resistant tubular cylinder. Double deadbolt locking.

#830610 1/2" diameter removable shackle

E. Heavy Duty Locking Cable Braided steel vinyl coated cables in 3/4" or 5/8" diameters for serious, but flexible security. Integrated 7-pin pick and drill resistant tubular locking mechanism.

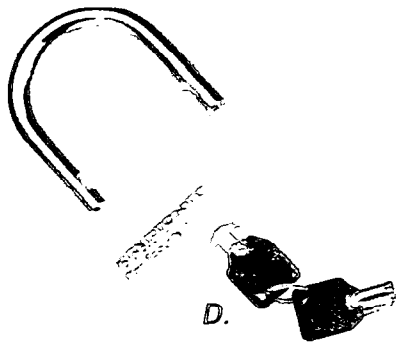

#810315 6' x 3/4" diameter cable

#820703 6' x 5/8" diameter cable

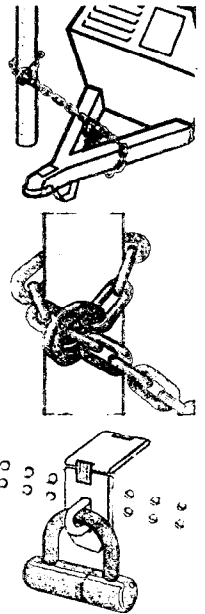

F. Heavy Duty Flexible Steel Cable Braided steel vinyl coated cable in 5/8" diameter with extra long oversized swages. Double loop design allows cinching for more usable length and more flexible lock-up options with Kryptonite padlocks or virtually any high security padlock.

#820406 7' x 5/8" diameter cable

KRY 001481

Designed to stop theft and unauthorized use in the **HIGHEST RISK LOCATIONS.** Alloys of triple heat-treated Boron Manganese, Kryptonium™ and Molybdenum are combined with street-smart engineering to ensure that these are Kryptonite's strongest, professional-grade Flex Security products.

Professional Padlock Series
Extreme-Duty padlocks including:

G. Solid Stainless Steel Padlock — Marine Grade Stainless steel padlock with shrouded stainless steel shackle for increased resistance to sawing, cutting and prying attacks. Double deadbolt locking mechanism. Quick-change shackle design. 6-Pin Brass cylinder is rekeyable and changeable. Accepts Lori, Medeco, Schlage and American Lock cylinders. Locks are keyed alike — 6 per box.
 #851103 KA 1 1/2" / 38mm Body, 1" / 25mm Shackle Length, 1/4" / 6.3mm Diameter
 #851110 KA 2" / 50mm Body, 1 1/8" / 27.5mm Shackle Length, 3/8" / 9.5mm Diameter
 #851127 KA 2 1/2" / 63mm Body, 1 1/8" / 27.5mm Shackle Length, 1/2" / 10mm Diameter

H. Solid Steel Padlock Hardened solid steel padlock with Molybdenum steel shackle for greater resistance to sawing, cutting and prying attacks. Double deadbolt locking mechanism. Quick-change shackle design. 6-Pin Brass cylinder is rekeyable and changeable. Accepts Lori, Medeco, Schlage and American Lock cylinders. Locks are keyed alike — 6 per box.
 #851134 KA 1 3/4" / 46mm Body, 1 1/8" / 27.5mm Shackle Length, 5/16" / 8mm Diameter
 #851141 KA 2 1/8" / 54mm Body, 1 1/8" / 28mm Shackle Length, 3/8" / 9.5mm Diameter
 #851158 KA 2 3/8" / 61mm Body, 1 1/8" / 27.5mm Shackle Length, 7/16" / 11mm Diameter
 #851165 KA 2 3/4" / 70mm Body, 1 1/8" / 27.5mm Shackle Length, 1/2" / 12mm Diameter

I. Solid Steel Shrouded Padlock Hardened solid steel padlock with shrouded Molybdenum steel shackle for maximum resistance to sawing, cutting and prying attacks. Double deadbolt locking mechanism. Quick-change shackle design. 6-Pin Brass cylinder is rekeyable and changeable. Accepts Lori, Medeco, Schlage and American Lock cylinders. Locks are keyed alike — 6 per box.
 #851172 KA 1 3/4" / 46mm Body, 1" / 25mm Shackle Length, 5/16" / 8mm Diameter
 #851189 KA 2" / 50mm Body, 1 1/8" / 27.8mm Shackle Length, 3/8" / 9mm Diameter
 #851196 KA 2 3/8" / 61mm Body, 1 1/8" / 27mm Shackle Length, 7/16" / 11mm Diameter
 #851202 KA 2 3/4" / 70mm Body, 1 1/8" / 27mm Shackle Length, 1/2" / 14mm Diameter

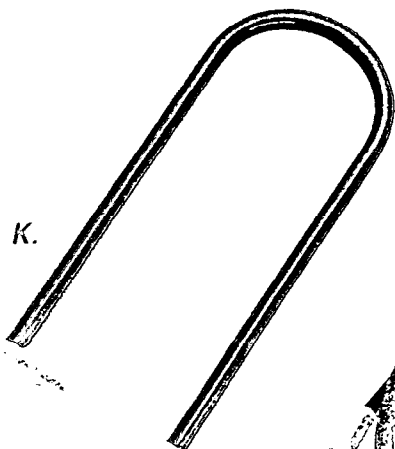

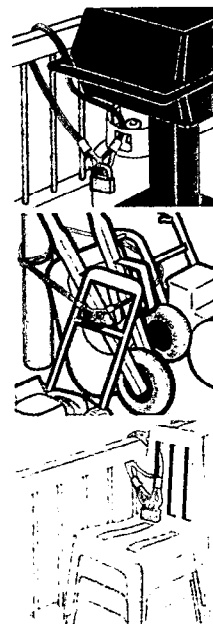

J. Heavy Duty Solid Steel Padlock Hardened solid steel padlock with Molybdenum steel shackle for greater resistance to sawing, cutting and prying attacks. Double deadbolt locking mechanism. Quick-change shackle design. 6-Pin Brass cylinder is rekeyable and changeable. Accepts Lori, Medeco, Schlage and American Lock cylinders. Locks are keyed alike — 6 per box.
 #851219 KA 2 1/2" / 63.5mm Body, 1" / 25mm Shackle Length, 7/16" / 11mm Diameter
 #851226 KA 2 1/2" / 63.5mm Body, 2" / 50mm Shackle Length, 7/16" / 11mm Diameter
 #851233 KA 2 1/2" / 63.5mm Body, 3" / 75mm Shackle Length, 7/16" / 11mm Diameter

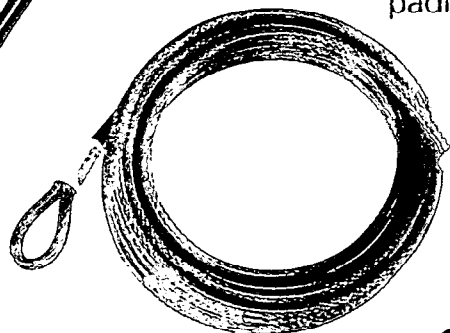

Better

Designed to stop theft and unauthorized use in MEDIUM TO HIGH RISK LOCATIONS.

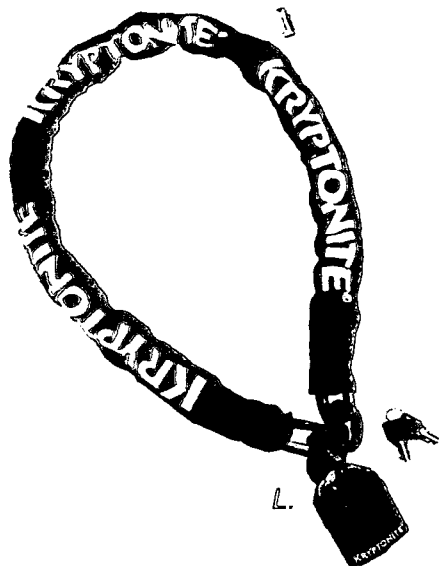

Heavy-duty braided steel cables, as well as industrial-grade padlocks, ensure that these Flex Security products will provide serious security on the job or on the weekend.

K.

M.

L.

P.

O.

Q.

N.

K. Extra Large Padlock Padlock features extra large case hardened steel shackle. 7-pin pick and drill resistant tubular cylinder. Inner dimensions of shackle are 11" x 4" (28 centimeters x 10 centimeters). #830603 1/2" diameter shackle

L. Hardware Chain & Padlock Chain features a square link design for increased cut resistance and a nylon cover to protect equipment. Padlock features a case hardened steel shackle and 7-pin pick and drill resistant tubular cylinder. #810216 4'3" chain and covered padlock

M. Flexible Steel Cable Braided steel vinyl coated cable in 3/8" diameter with extra long oversized swages. Double loop design allows cinching for more usable length and more flexible use with Kryptonite padlocks or virtually any padlock. #830504 30' x 3/8" diameter cable #830412 15' x 3/8" diameter cable #830405 7' x 3/8" diameter cable #830306 4' x 3/8" diameter cable

N. Armored Padlock Padlock features solid forged internal body and high-impact ABS housing with steel shroud for greater protection against attack. Kryptonium™ steel shackle for maximum cut resistance. 7-pin pick and drill resistant tubular cylinder. Dust cover protects cylinder against grime and weather. #850212 7/16" diameter shackle. #850205 5/16" diameter shackle.

O. Marine Grade Chrome Plated Brass Padlock Padlock features case hardened steel shackle. Double deadbolt locking. Corrosion resistant nickel-plated pins in cylinder. Exceeds ASTM, ISO and DIN standards in 1000 hour salt spray test. #850144 2" 50mm #850137 1 1/2" 40mm #850120 1" 25mm

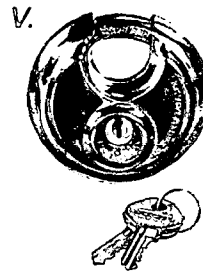

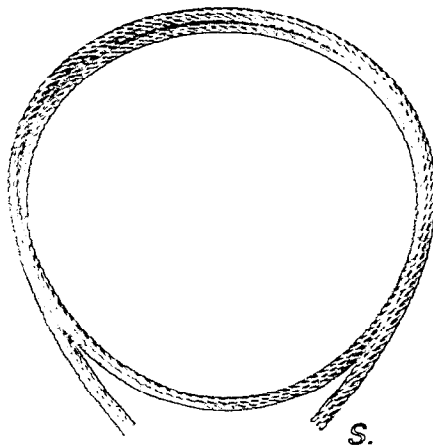

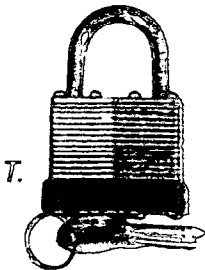

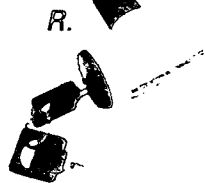

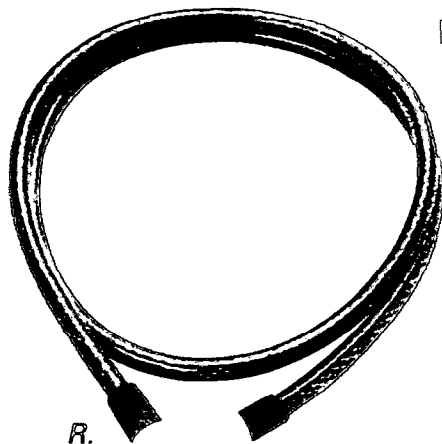

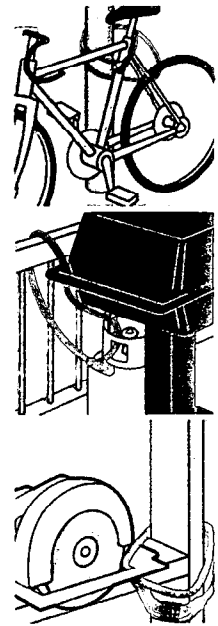

P. Chrome Plated Brass Padlock Padlock features case hardened steel shackle. Double deadbolt locking. 7-pin pick and drill resistant tubular cylinder. #850168 2" 50mm #850106 1 3/4" 45mm #850151 1 1/2" 40mm

Q. Brass Padlock Padlock features case hardened steel shackle. Double deadbolt locking. Solid brass body and cylinder for all weather performance. #850298 2" 50mm #850267 1 1/2" 40mm #850274 1 1/2" 40mm 2-pack, keyed alike #850281 1 1/2" 40mm 4-pack, keyed alike

Good

Designed to stop theft and unauthorized use in
LOW TO MEDIUM RISK LOCATIONS.

Flexible, braided steel cables and high-quality padlocks in the most popular sizes ensure that these Flex Security products will provide great protection against "grab and dash" thefts on the job, around the yard, in the garage, anywhere and anytime.

R. Key Cable Flexible, 1/2" diameter vinyl coated steel cable with a tough integrated key lock. Weather resistant cylinder. Two coded keys.
#830139 5' x 1/2" diameter cable

S. Resettable Combination Cable Flexible, 3/8" diameter vinyl coated steel cable with a tough integrated 4-digit resettable combination lock. Combination can be set and reset quickly and easily.
#830207 5' x 3/8" diameter cable.

T. Laminated Steel Padlock Padlock features a case hardened steel shackle. Double deadbolt locking. Plated, laminated steel body.
#850380 2 1/2" 64mm
#850373 2" 50mm
#850359 1 3/4" 44mm
#850366 1 3/4" 44mm, 2 1/2" shackle
#850328 1 1/2" 40mm
#850335 1 1/2" 40mm, 2-pack keyed alike
#850342 1 1/2" 40mm, 4-pack keyed alike

U. Covered Laminated Steel Padlock Padlock features a case hardened steel shackle. Double deadbolt locking. Plated, laminated steel body, covered cylinder for increased weather protection.
#850403 1 1/2" 40mm
#850410 1 1/2" 40mm, 2-pack keyed alike

V. Stainless Steel Padlock Padlock features armor-protected hardened steel shackle. Double deadbolt locking. Stainless steel deep welded body.
#850434 2 3/4" 70mm

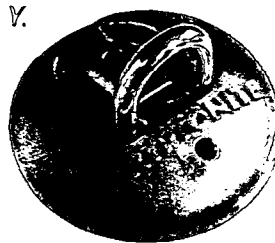

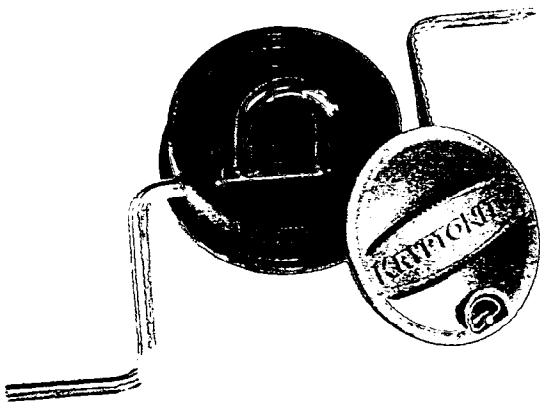

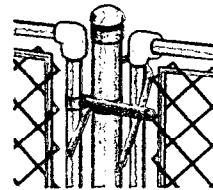

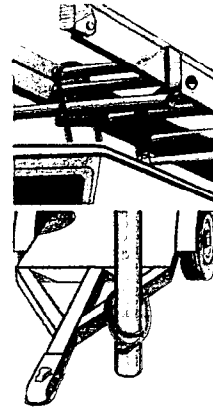

W. Stainless Steel Combination Padlock Padlock features case hardened steel shackle. Right-Left-Right dial mechanism offers 64,000 combinations.
#850175 2" 48mm

X. E Z Touch Combination Padlock Padlock features patent-pending ergonomic dial that can be set using one hand. Right-Left-Right dial mechanism offering 64,000 combinations. Hardened steel shackle. Protective plastic shroud over hardened steel body.
#850441 2" 50mm

KRY 001484

Specialty

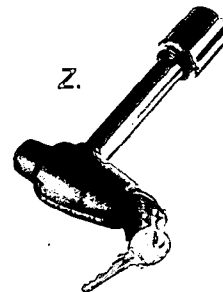

Specialized security solutions designed to stop theft and unauthorized use, including high security ground anchors, locking trailer hitch pins, and adjustable length ladder locks.

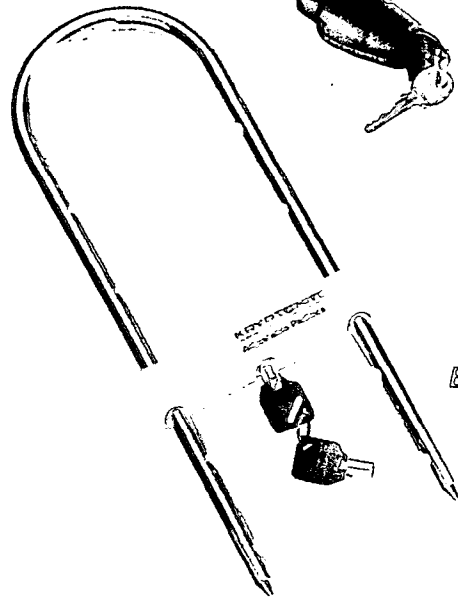

AA.

Z.

BB.

Y. StrongHold Security Anchor An extra-tough theft resistant locking point, for use indoors and out, providing protection from ride-away, roll-away and lift-away theft. 5/8" hardened carbon alloy steel shackle lays flat when not in use. Weatherproof, impact resistant body. Available in both above-ground and in-ground versions. Above-ground version includes 5/8" cement anchor bolts. In-ground version includes reinforced steel anchor bars which can be buried up to 10" depth. Recommended for both commercial and residential installation.

#330219 In-ground security anchor
#330202 Above-ground security anchor

Z. Locking Hitch Pins Serious security for receiver style trailer hitches and hitch-mount racks. High-security hardened steel locking head swivels for easy use in tight locations. Double chrome plated for corrosion resistance. Protective keyway cover.

#360209 1/2" pin diameter, fits class II 1 1/4" receivers
#360216 5/8" pin diameter, fits class III 2" receivers

AA. Hitch Pin Security Cable For use with all Kryptonite locking hitch pins. Secure gear with cable then slide steel loop end onto hitch pin and lock into place. Braided steel cable increased resistance to cutting and sawing. Extra large loop end for cinching.
#360216 12" x 1/2" cable (3.7m x 13mm)

BB. Ladder Lock Padlock adjusts from 3" to 11" allowing lock-up of one or multiple ladders. Case hardened steel shackle. 7-pin pick and drill resistant tubular cylinder. Double deadbolt locking. Ideal for securing ladders to vehicle roof rack.
#830634 1/2" diameter shackle

KRYPTONITE

*There is a material difference in
Kryptonite Flex Security Products.*

*Not all cables and padlocks
are created equal!*

*Kryptonite's
product superiority
is obvious:*

Flex Security Cables

- Braided steel cables with more steel per inch than twisted strand cables - more strength and greater cut-resistance
- Vinyl coated double loop design for ease of use
- Oversized swages with metal to metal contact - more security and greater pull strength

Padlocks

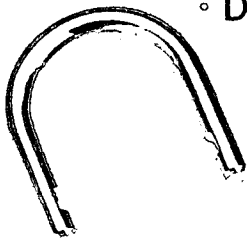

- Pick-resistant tubular key cylinders and changeable cylinder cores which accommodate the most popular key styles
- 6-pin and 7-pin cylinders vs standard 5-pin cylinders for increased pick resistance

◦ Double deadbolt construction

- Hardened steel shackles for increased resistance against, saws, chisels, cutters

- Flexible shackle lengths, dimensions and designs - even removable and adjustable shackle models

- Key replacement services available

FLEX SECURITY™

KRY 002525

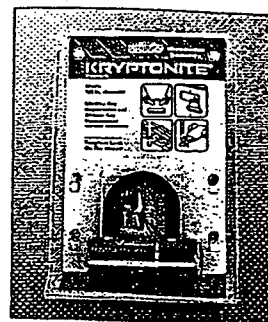

KRYPTONITE®

NEW YORK SERIES MAXIMUM SECURITY

PADLOCK

New design, maximum security padlock will stop bolt cutters, saws, hammers and chisels. Case hardened, vinyl coated, 1/2" Kryptonium Steel™ shackle withstands 10,000 pounds of pull force. Patented "bent foot" and pivoting shackle add strength and flexibility. 7-pin, pick-and-drill resistant, tubular locking mechanism. Weather resistant. Lifetime warranty. Lifetime key registration and replacement service.

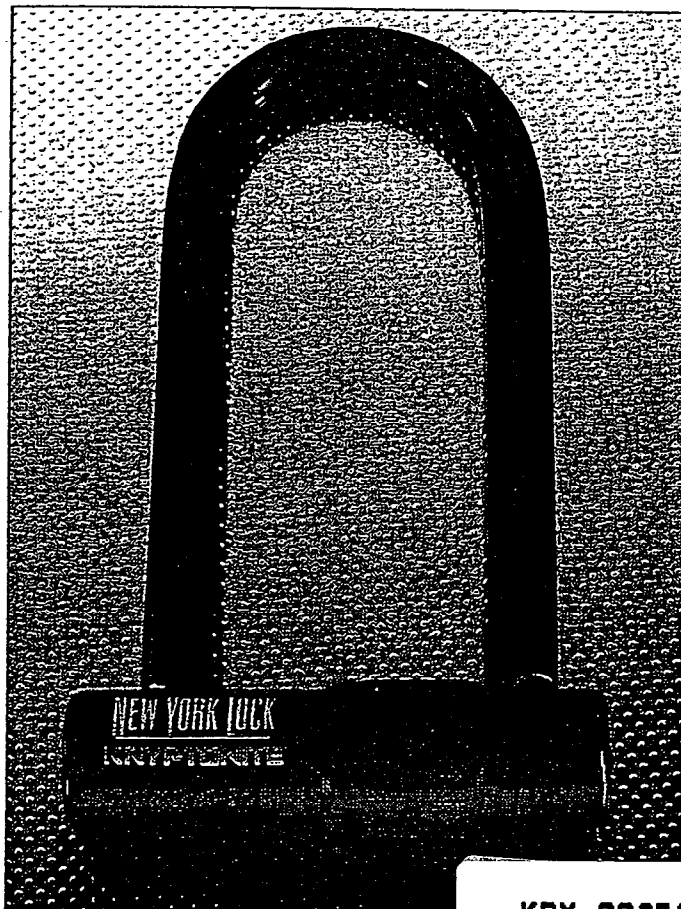

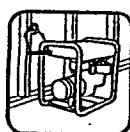

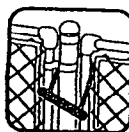

Part # 810506
Master Pack: 5
Dimensions: padlock shackle:
length: 1 45/64" (4.8 cm)
width: 1 29/32" (4.3 cm)
diameter: 1/2" (13 mm)
Color: black

UTILITY LOCK

Maximum security U-lock withstands 12,000 pounds of pull force. Outperforms conventional U-lock designs. Case hardened, vinyl coated, 5/8" Kryptonium Steel™ shackle and shortened cross-bar provide superior resistance to attack. Patented "bent foot" design adds strength and flexibility. 7-pin, pick-and-drill resistant, tubular locking mechanism. Weather resistant. Lifetime warranty. Key registration and replacement service.

Part # 810407
Master Pack: 5
Dimensions: shackle:
length: 8" (20.3 cm)
width: 3" (7.6 cm)
diameter: 5/8" (15mm)
Color: black

KRY 002526

STREET SERIES TOUGH SECURITY

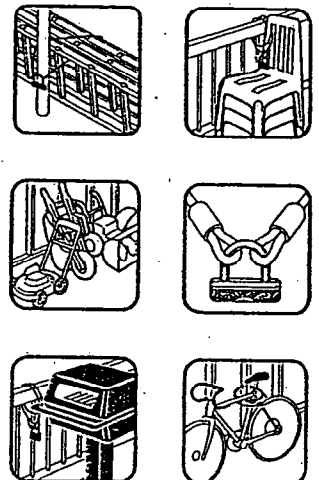

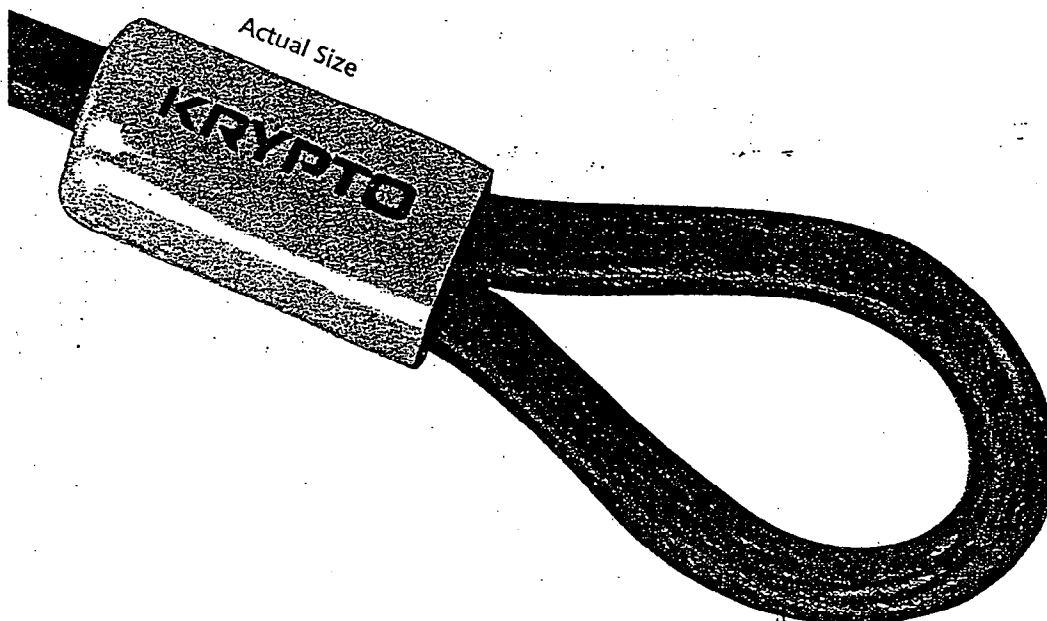

FLEXIBLE STEEL CABLE

Braided steel, 3/8" diameter, vinyl coated cable. More flexibility and more steel per inch than twisted strand cable. Double loop design for more functional length and ease of use with Kryptonite® Padlocks, Utility Locks or virtually any padlock. Weather resistant. Lifetime warranty.

Part # 830504
Master Pack 5
Unit dimensions: length: 30' (9.1 m)
diameter: 3/8" (10 mm)
Color: smoke gray and yellow

Part # 830405
Master Pack 5
Unit dimensions: length: 7' (2.1 m)
diameter: 3/8" (10 mm)
Color: smoke gray and yellow

Part # 830306
Master Pack 5
Unit dimensions: length: 4' (1.2 m)
diameter: 3/8" (10 mm)
Color: smoke gray and yellow

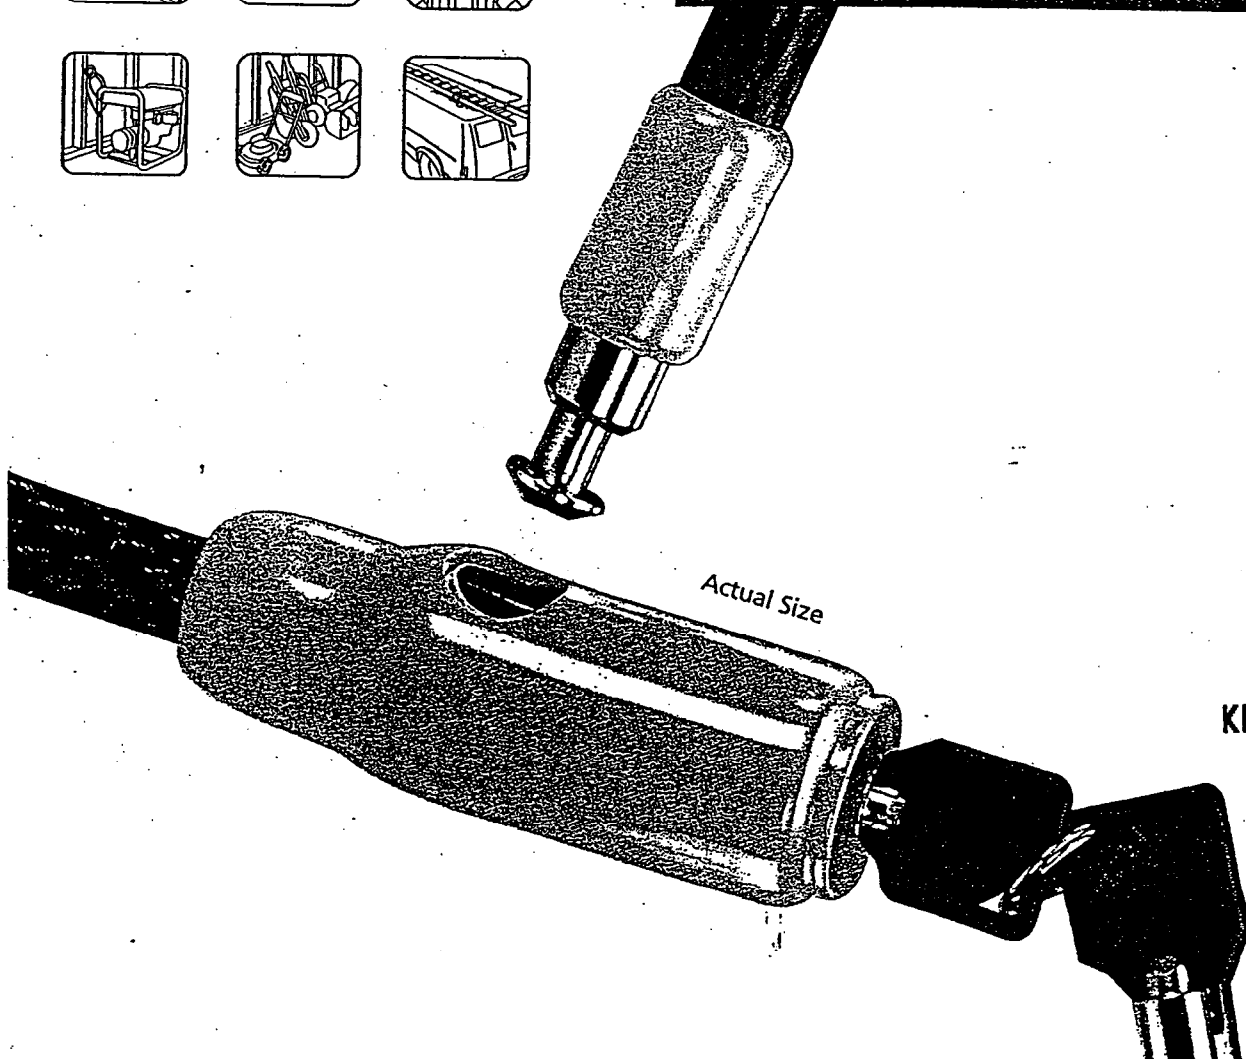

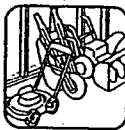

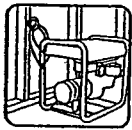

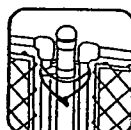

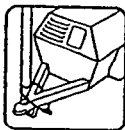

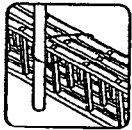

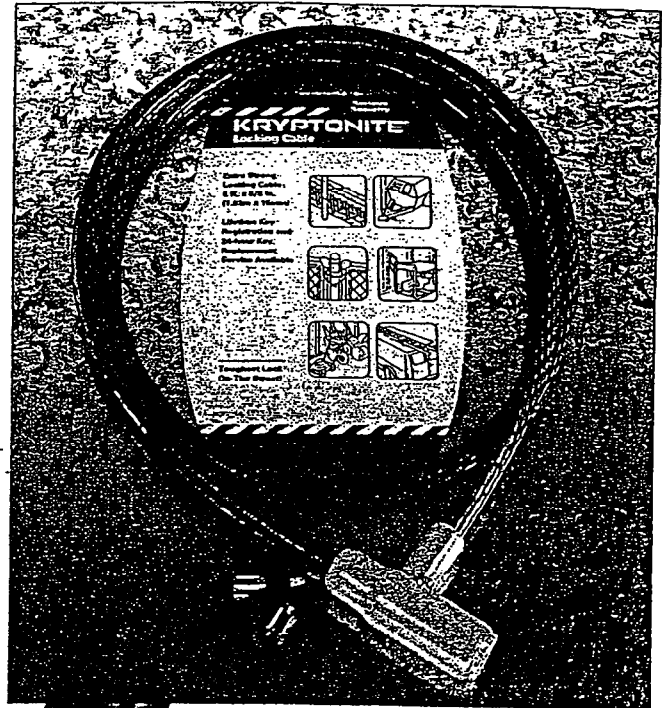

KRY 002527

CONTRACTOR SERIES SERIOUS SECURITY

LOCKING CABLE

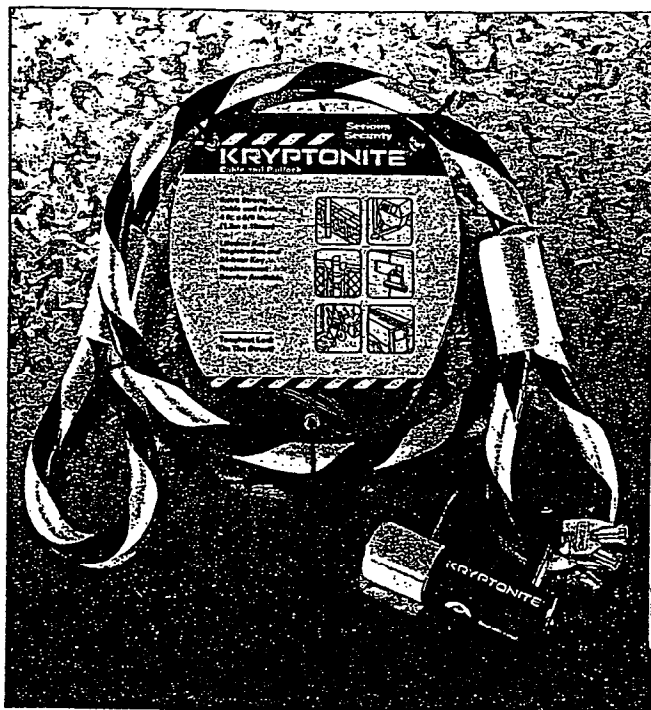

Braided steel strand, 5/8" diameter, vinyl coated cable provides serious strength. More flexibility and more steel per inch than twisted strand cable. Built-in, 7-pin, pick-and-drill resistant, tubular locking mechanism. Weather resistant. Lifetime warranty. Lifetime key registration and replacement service.

Part # 820703
Master Pack: 5
Dimensions: length: 6' (1.82 m)
diameter: 5/8" (15 mm)
Color: smoke gray and yellow

KRY 002528

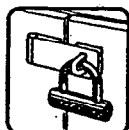

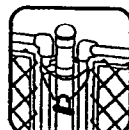

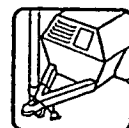

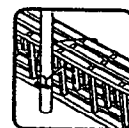

CONTRACTOR SERIES SERIOUS SECURITY

CABLE AND PADLOCK

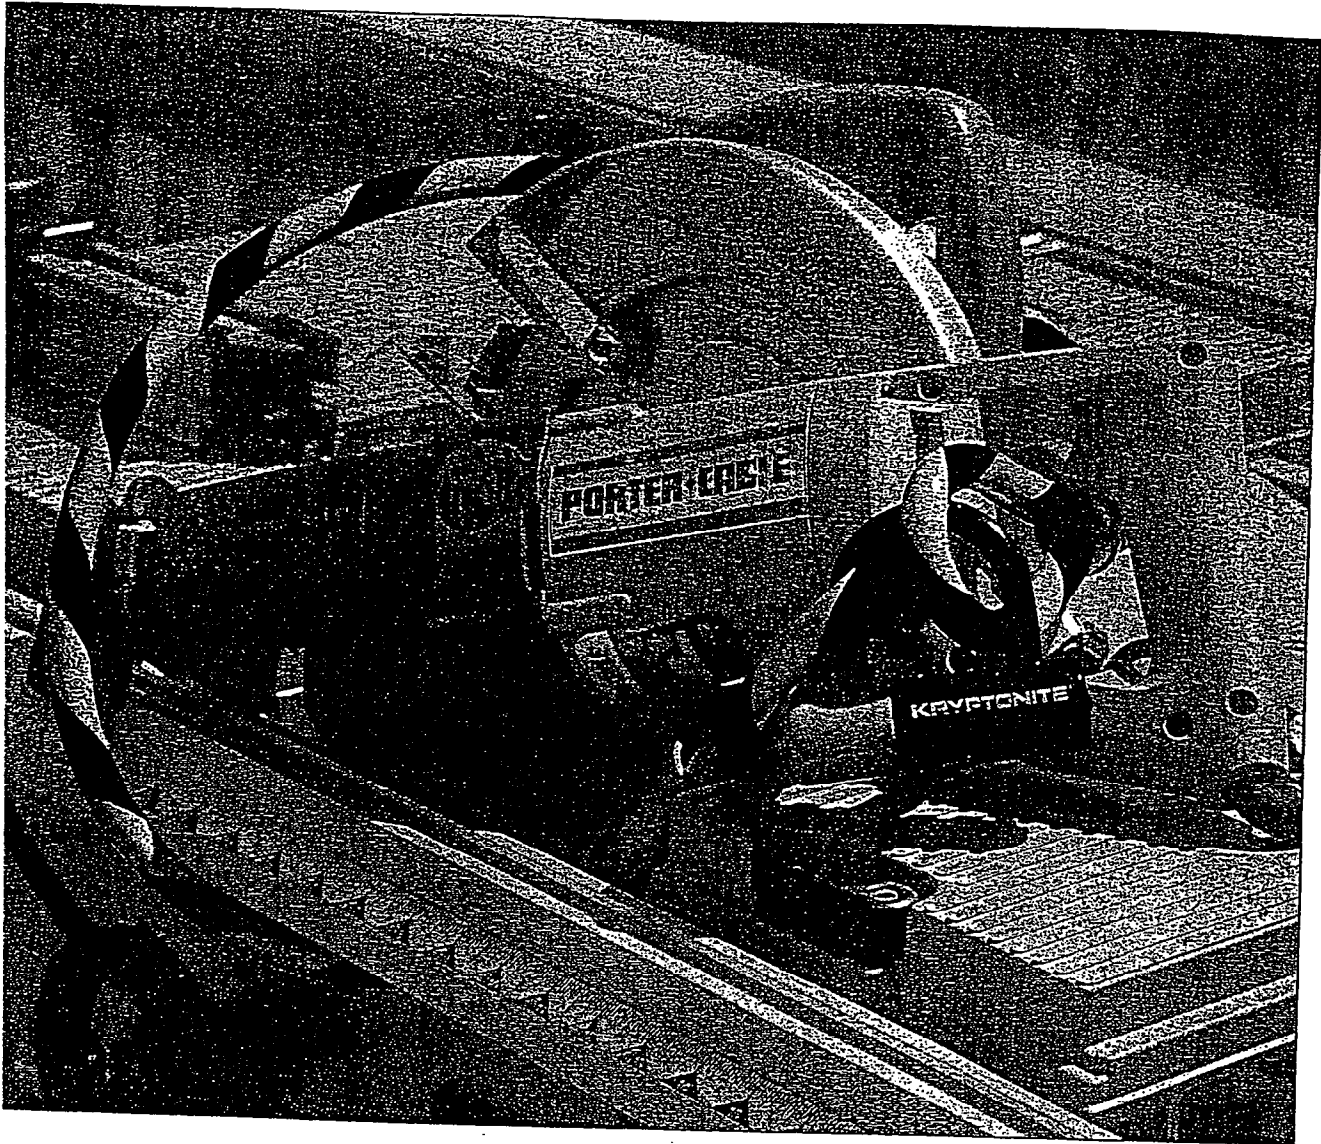

High visibility, vinyl coated, 5/8" diameter, braided steel cable. More flexibility and more steel per inch than twisted strand cable. Double loop design for more usable length. Padlock features a heavy duty case hardened 7/16" Kryptonium Steel™ shackle that can withstand over 20,000 pounds of cutting force. Patented "bent foot" design adds serious strength and flexibility. 7-pin, pick-and-drill resistant, tubular locking mechanism. Weather resistant. Lifetime warranty. Lifetime key registration and replacement service.

Part #	820208
Master Pack:	5
Dimensions:	cable: length: 4' (1.2 m) diameter: 5/8" (15 mm) padlock shackle: length: 1 51/64" (4.5 cm) width: 1 51/64" (4.5 cm) diameter: 7/16" (11 mm)
Color:	black and yellow

KRY 002529

CONTRACTOR SERIES *SERIOUS SECURITY*

CONTRACTOR SERIES:

Research has shown that contractors expect at least 2% of the overall cost of every construction job to be lost to theft. Reducing theft means more money in contractors' pockets. The Contractor Flex Security™ Series is the *serious security* contractors can use to improve the bottom line.

The Contractor Flex Security™ Series is a formidable deterrent against theft and unauthorized use on any construction site. It's visually discouraging to thieves and offers superior functionality. Components can be used alone or together to meet the security needs of any serious theft-risk location.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD

SCHLAGE LOCK COMPANY,

Opposer,

v.

Opposition No. 91 159885
Serial No. 76/493,797

ALTO PRODUCTS CORP.,

Alto.

DECLARATION OF LORI S. MEDDINGS

I, Lori S. Meddings, hereby declare under penalty of perjury as follows:

1. I am one of the attorneys for Schlage Lock Company in connection with the above-captioned matter.
2. Exhibit A attached hereto is a true and correct copy of printouts from the United States Patent and Trademark Office website showing Opposer's U.S. Reg. Nos. 2,643,213, 2,656,797, and 2,269,238.

I declare under penalty of perjury that the foregoing statements are true and correct.

Dated this 6th day of July, 2005.

Lori S. Meddings
